**THE RANGE** 8

**OUR BRANCHES** 58

### **Kubota Agricultural Machinery**

Kubota tractors are among the most robust farm machinery that you could choose to invest in, their high-level of performance will mean that they have become indispensable companions when carrying out day-to-day farm activities. There is something for everyone in the comprehensive range of agricultural tractors, each offered with different power levels, transmission modes and widths for various settings. Every diesel engine Kubota make is designed to be economical whilst delivering the power you need to carry out demanding jobs.

### **Total Trust**

Kubota's slogan has always been 'For the earth, for life' and it remains something that is at the heart of what they do. You can see this throughout the entire tractor range as well as all of the other agricultural machinery Kubota make. With experience that dates back to the end of the 19th century, Kubota Europe SAS has the experience and know-how to offer its customers a truly versatile range of products optimised for all agricultural projects.

Here at Lister Wilder we are proud to be representing the full range of Agricultural machinery across our three Agricultural depot locations, and this range guide will give you a brief outline of the tractors and implements that are available. Seeing is believing though, so we would welcome the opportunity of on-farm demonstrations to show you the products, technology, reliability and efficiency that Kubota Agricultural Machinery has to offer

# A FAMILY BUSINESS GOING FROM STRENGTH TO STRENGTH

Here at Lister Wilder we're very proud to remain a wholly owned family business since 1947. Now in its third generation, with industry demands at an all time high, we aim to constantly grow and evolve to stay ahead of the curve. However, we never lose sight of where we began. Over 70 years of knowledge and expertise is an unparalleled strength for the business, and we hope the achievements we have won along the way reflects this. We could write a rather long timeline detailing all of these. Instead we thought it best to cover some of our own favourite memories.

## ESTABLISHED

1947

Tractors & Farm Aids (TFA) is founded by George Scott and begins selling and supporting the Massey Ferguson range of Agricultural machinery from its base in Reading, Berkshire. At the time there was only one MF dealership smaller than ourselves...and they were on the Channel Islands.

## NEW BEGINNINGS IN OXFORDSHIRE

1982

Walter Wilder, based in Wallingford, relinquished the MF dealership for Oxfordshire. This was our first opportunity to really grow under the ownership of Scott & King who were able to purchase the premises and take on the majority of the Walter Wilder team.

## TFA ACQUIRES LISTER FARM SALES

1987

Lister Farm Sales, Massey Ferguson dealers for Gloucestershire, are looking to pull out of the industry and an agreement is reached with TFA. The companies continued to operate as TFA, Walter Wilder and Lister Farm Sales albeit all under the same family ownership.

## EXPANDING INTO GROUND CARE

1995

Our Groundcare division is formed and soon after the Kubota franchise is added - this immediately accelerates our growth and Reading becomes the new hub for this business

## INTRODUCING LISTER WILDER

2000

A decision is taken to combine the strength of the 'Lister' name in the West with the reputation of 'Wilder' in the East, and the company is renamed as Lister Wilder - So Tractors & Farm Aids is integrated with the more diverse nature of our offering.

## ASHFORD OPENS ITS DOORS

2009

Our Ashford branch opens its doors, initially focusing on Groundcare machinery before expanding and becoming a Kubota construction centre as well.

## BRISTOL BRANCH EXPANDS TO FULL POTENTIAL

2008

A service centre is opened on the outskirts of Bristol that grows steadily to become a fully-fledged branch along with sales and parts support.

## NEW BRANCH OPENING IN GUILDFORD

2004

With London and Surrey being such a heavily populated area, a decision was taken to open a new branch in Ockham, near Guildford. Sited just off the A3, it acts as a great hub for our Sales, Service and Parts team to serve the surrounding area.

## MOVING INTO ARBORICULTURE

2002

The Arboriculture division is formed and is built around the Timberwolf, Stihl and Husqvarna franchises. This small, dedicated team deal with tree surgeons and contractors to supply and support this specialist kit.

## INTRODUCING CONSTRUCTION

2001

With Agriculture and Groundcare now thriving, the decision was made to move into the supply and support of Construction machinery - essentially mini excavators. Again, the Kubota range was soon added and the business has steadily grown with the team now selling around 700 units a year.

## WINNING AWARDS & A NEW BRANCH

2012/3

We are awarded the prestigious Gold Service Award from Kubota along with the Service Dealer:  
- Groundcare Dealer of the Year  
- Agricultural Dealer of the Year  
A new branch at Southam opens for business.

## KUBOTA ANNOUNCES MOVE INTO AGRICULTURE

2015

With Kubota already a World leader in the sub 100hp tractor market, their desire to move into the Agricultural market was seen as a natural move by everyone in the industry.

## KUBOTA CENTRE OPENS IN KENT

2017

Eight years after the original branch opened its door, the business has clearly outgrown its site and with the addition of Kubota Agriculture, a new branch is opened and becomes the first fully-fledged Kubota Centre in the country.

## THE BEDROCK OF WHAT WE DO

2020

Having steadily grown with AGCO and Kubota, it become clear that it would be impossible to represent both brands long term. As a result, we uncoupled from AGCO protecting jobs and a clear pathway whereby we could focus on a Kubota full line offering.

## A 'NEW' LISTER WILDER

2022

With a fresh clarity and purpose, the 'New' Lister Wilder gets off to a flying start with two new Kubota Centres opening up - one in Keynsham (exactly halfway between Bristol & Bath) and the other at Bibury, just on the outskirts of Cirencester.

## Toby Bennett

Head of Sales Agriculture

**'The family run ethos of Lister Wilder and its reputable repour with customers makes me proud to be a part of the team.'**

We are delighted to announce the expansion of our Lister Wilder team with Toby accepting the role of Head of Sales for our Agriculture division. A familiar face within the Lister Wilder organisation, Toby originally started at the company in 2003 in the service department at Devizes branch. Toby's drive and customer focussed manner saw a natural progression into sales for both ground care and agriculture departments of Lister Wilder.

Toby comes from a strong agricultural background and grew up on an 800-acre mixed farm in Wiltshire. Growing up on a family farm meant Toby turning his hand to most jobs from early-morning milking's to ploughing the fields and calving cows, but it was engineering and machinery that captured his attention the most. Toby loves anything to do with farm equipment, whether it was driving or fixing it, there was a clear passion there. For Toby it seemed natural to pursue a career in farming and he went on to study at Lackham

Agricultural College where he achieved his National Diploma in Agriculture.

After the family farm was sold Toby found himself beginning a role on a large arable and beef farm, this really provided him with an opportunity to broaden his experience in arable applications. Taking on the spraying and combining for the farm provided invaluable knowledge of both machine operation and the maintenance involved.

Toby felt it was time to move onto something different and that is when the opportunity to join the team at Lister Wilder was presented to him. Over the years Toby has predominantly focused on ground care sales but his deep-rooted passion for agriculture has never been lost and he still lives on the farm with his family today. Toby's knowledge and love for the industry make him an asset to our business going forward.

'The family run ethos of Lister Wilder and its reputable repour with customers makes me proud to be a part of the team. Seeing the company grow over the last 17 years has been fantastic and I am so looking forward to this new chapter. Growing the Agricultural business in our area is an exciting prospect and I am confident we have a bright future with the Kubota brand in the farming community.'

When not working, I spend my time running around after my two daughters (and my wife). We are fortunate to still live on the farm, which although has changed massively over the past 20 years, we are still able to enjoy the outdoor farming life.

# M7003

## THE POWERFUL PROFESSIONAL TRACTOR

The Kubota M7003 sets new standards for professional agricultural tractors. Thanks to the first-class technology and comfort, as well as the intelligent Precision Farming solutions, top performance is guaranteed.

### Strong performance

The new V6108 TIER V engine offers more power with lower fuel consumption thanks to an optimised power curve.

### Highly efficient gear change

The Kubota M7003 transmissions are designed for maximum efficiency under every operating condition.

### High performer

Hydraulics and linkage of the M7003 are perfectly matched to the unique performance of this high performing tractor.

### Targeted use

The modern M7003 tractors are ISOBUS-certified and therefore can support all customer needs and requirements.

### Perfect command centre

The spacious cab offers an extremely comfortable workplace that is optimised to the needs of the driver.

Models	HP Max. Power without Boost	Transmission
M7133	130	KVT K-Power +
M7153	150	KVT K-Power +
M7173	170	KVT K-Power +

# THE ALL-ROUNDER FOR MAXIMUM OPERATING PERFORMANCE

The Kubota M6002 has the most powerful 4-cylinder engine in the agricultural sector. Kubota's powerful Stage 5 engine delivers full power over a wide speed range, even under varying loads. What's more, the generous 230-litre fuel tank means you can work long days.

## Masses of power

The new high-capacity Stage V engine guarantees maximum performance, efficiency and reliability.

## High-performance transmission

The M6002's transmission is designed for high speeds and heavy payloads.

## Impressive lifting capacity

The CCLS hydraulics provides high performance for both the rear and front linkages of the tractor.

## Comfort and space

The Kubota M6002's cab offers plenty of space as well as high levels of comfort and optimised ergonomics.

## Unique manoeuvrability

Its exceptional agility makes the M6002 the ideal tractor for tight spaces and frequent turning manoeuvres.

Models	HP Max. Power without Boost

M6-132	133
M6-142	143

# M6002

# M6001

## THE CLEVER ALL-ROUNDER

The M6001 Utility is an all-rounder that fully deserves this title. Kubota's new utility tractor offers all the features that larger dairy and livestock farms, arable farms and municipal users want: full power, great comfort, high functionality and excellent manoeuvrability. The modern engines of this versatile tractor will convince you as well: they are not only highly efficient and powerful, but also meet the strict EU Stage V emissions standard.

### Everything at hand

Kubota-typical, smart switching elements save you time without the need to distract you from your actual job.

### Extraordinary 8-speed powershift:

With the tried and tested Intelli-Shift transmission, you can shift gears easily at the touch of a button via a gear lever. Shifting up or down is equally simple.

### Powerful and uncomplicated

Thanks to a large external hydraulic cylinders, the Category III 3-point linkage provides excellent lifting capacities. The powerful hydraulic pump also allows you to handle any implement with maximum productivity.

### Manoeuvring in the tightest of spaces

The M6001 unique narrow turning radius is further enhanced by its bevel-driven front axle – another exclusive advantage of Kubota. Its thanks to this that a higher ground clearance can be achieved. This means you can drive into high crops where other tractors can't. Even large swaths of hay will remain undamaged.

### Optional ISOBUS on board

A connection at the rear of the tractor allows the ISOBUS units to display in cab on IsoMatch Tellus Pro 12" or Tellus Go 7" monitors.

All implement settings can be made conveniently from your seat via the touch screen display. You can customize the monitors to fit your individual needs.

M6-121 U	123
M6-131 U	133
M6-141 U	143

## THE SMART GO-GETTER

The Kubota M5002 is an extremely manoeuvrable tractor - the smart go-getter in its class. With its powerful engine, excellent transmission, high ground clearance and exceptionally simple operating controls, it quickly becomes indispensable for daily work.

### Extremely powerful

The 4-cylinder engines with 95 and 115hp (ECE R 120) have impressively reliable power and high efficiency.

### Surprisingly comfortable

The comfortable and generous cab provides an optimal panoramic view. Thanks to the clear arrangement of all control elements, not a movement is wasted.

### Smooth operation

With its 36 forward and 36 reverse gears (for cab models) and 18 forward and 18 reverse gears for ROPS models), shifting gears in the M5002 is extremely smooth and comfortable.

### Highly manoeuvrable

The M5002 is agile and manoeuvrable thanks to its front axle bevel-gear.

### Environmentally friendly

The V3800 engine meets the requirements of the Stage V Final emission standard.

### Impressively precise

The M5002 is much more than a tractor. With ISOBUS retrofit terminals and Kubota implements, it is the answer to any challenge. Plus with the potential of precision farming solutions, it saves time and money.

Models	HP
M5092	95
M5112	115

# M5002

# M5001 Narrow

## A SLENDER WORKER

The Kubota Narrow tractor series is now even better than before, offering up to 108hp. Kubota engineered the M5001N specifically for work in any environments that require a narrow tractor. It also features a new high/low powershift transmission with 6 synchronised gears and a powerful engine.

### Performance

The M5001N is ideal for demanding tasks in orchards, fruit cultivation and vineyards. It delivers the highest levels of agility, versatility and performance.

### Control

With the optional IsoMatch Tellus monitors, you can turn your M5001N into an ISOBUS control tractor. You can take your work to a new level of efficiency, saving time and resources, and therefore money

### Optimisation

Retrofit kits make the M5001N fit for Precision Farming. You can now take advantage of

the many possibilities offered by this state-of-the-art technology from Kubota for the most efficient and environmentally friendly management of your land.

### Value Protection

Kubota tractors offer proven quality and excellent performance. Kubota offers you a two-year warranty on the M5001N, which you can opt to extend to five years with the Kubota Care package.

### Finance Management

Bespoke finance packages allow you to tailor payment options to suit your business needs.

M5091N	92/93
M5101N	103/105

# THE PERFECT ALL-ROUNDER FOR FARM AND FIELD WORK

The Kubota M4003 is the perfect all-rounder for farm work requirements. Thanks to reliable and proven technology, it can be relied on in all conditions.

## Cabin

The new spacious cab of the M4003 focuses on comfort and quality down to the smallest detail. It sets new standards not only in terms of size, but also through novel features such as the new pneumatic driver's seat and the optional passenger seat.

## Dashboard

A new digital dashboard provides all the necessary information and at a glance.

## Rear linkage

The powerful Category II rear linkage has a lift capacity of 2,500kg. This allows you to perform the most demanding tasks easily.

## Engine

The 4-cylinder V3307 engines with 3.3 l displacement deliver either 66 hp or 74 hp. The tractors are equipped with an EGR valve and new filters for exhaust gas treatment.

## New transmission

The new 18F/18R or 36F/36R transmission in the M4003 gives you the right working speed and efficiency for any job.

## Turning radius

Its compact design and the front axle with bevel gear drive make the M4003 series unbeatably manoeuvrable.

Models	HP
M4063	66
M4073	74

# M4003

# RTVs

## ADAPTABLE TO ALL SITUATIONS

On steep slopes and over rough surfaces, the RTV Utility Vehicles offer 4-wheel drive that adapts to all situations.

### Total control

Exclusive and innovative, the continuously variable hydrostatic transmission of the Kubota RTV provides an unequalled performance even in the most demanding conditions. Downhill, it gives you precise control of the vehicle through its engine braking. Under normal operating conditions it transmits all the power of the engine, thus providing a strong towing capacity.

### All terrain

Thanks to their compact chassis, their ease of handling obstacles, these utility vehicles

can operate on all types of sites. Highly appreciated for their robust construction and comfort, they are perfectly suited to both professional and amateur use.

### Driving comfort

On the highway or over the roughest terrain, the RTV series provides maximum comfort thanks to its innovative design and comfortable bench seat. The responsive hydrostatic steering and dynamic transmission braking give you the control you need to handle any terrain; while the independent suspension and high ground clearance literally soaks up all obstacles.

# Mowers

## TRUE PERFORMANCE!

All Kubota disc mowers are built for performance in even the toughest conditions. With a wealth of models, any requirement is covered, to make sure you will be able to make the most of the time available.

### DM1000 series

A new heavy duty cutterbar for this range. Compact build for smaller tractors and with working widths from 1.7 - 2.4m.

### DM2000 series

Lightweight, simple mowers with a compact but durable design for maximum output. 2.4, 2.8 and 3.2m working width.

### DM3000 series

Rear mounted machine with working widths of 2.8-4.0m. The machines can be operated by low horse-power tractors.

### DM3087-3095 series

Plain disc mowers with centre suspension and 8.7 - 9.5m working width, operated by tractors starting from 140hp.

### DM3300 series

Centre mounted plain disc mower with a hydraulically suspended design. Working widths of 3.2, 3.6 and 4.0m.

### DM4000 series

Outstanding ground following ability, easy operation and low weight are among the highlights. Working widths of 2.8 - 3.2m.

### Cutterbar

Kubota DM Series disc mowers have been developed with the clear goal of achieving perfect results under all conditions.

### NonStop BreakAway System

Fitted to Kubota DM2000, DM3000 and DM3300 series to protect and keep the cutterbar running.

### Key Features

- ✓ Built for performance in even the most toughest of conditions
- ✓ Reliable, robust and precise
- ✓ NonStop BreakAway

## HIGH CAPACITY MACHINERY

Kubota tedders help you produce high-quality crop, even under difficult weather circumstances. Ever-changing weather conditions often leave a very tight time window to prepare the crop. When the weather proves to be flexible, it is vital that your gear and equipment is just as flexible.

### TE4000-10000: High capacity machinery

For delivering the best possible output in the most efficient way requires a tedder that is made for all conditions. You need an easy but also robust machine that gets the job done to your satisfaction. The Kubota TE Series range delivers this and more!

### Mounted tedders – CompactLine

- ♦ Model TE4046-4052-6060- 8080.
- ♦ Working width between 4.60 and 8.05m.

### Trailed tedders – CompactLine

- ♦ Model TE4052T. Working width of 5.20m.
- ♦ Mounted tedders – ProLine

### Model TE4555-6568-6576- 8590-10511

- ♦ Working width from 5.50 to 9.00m.
- ♦ Transport carrier tedders – ProLine

### Model TE6576CD-8590C/CD

- ♦ Working width from 7.60 to 9.00m.
- ♦ Trailed tedders – ProLine

### Model TE6583T-1134T

- ♦ Working width of 8.05m
- ♦ Carrier frame tedders – ProLine

### Model TE8511C-10511C- 10514C

- ♦ Working width between 11.00 - 13.30m.
- ♦ Gearbox/mainframe

### Key Features

- ✓ CompactLine/ProLine: maintenance-friendly gearbox
- ✓ ProLine Super-C tines: provide even spread for a clean job
- ✓ Made for all conditions delivering the best possible output

# Tedders

# Rakes

## IMPRESSIVE RESULTS

Kubota rakes help you produce a high-quality crop, even under difficult weather circumstances. Ever-changing weather conditions often leave a very tight time window to prepare the crop. When the weather proves to be flexible, it is vital that your gear and equipment is just as flexible.

### CompactLine single rotor rakes

Designed for use on low horsepower tractors, but which still deliver considerable working width and a maintenance-friendly systems. Kubota single rotor rakes offer working widths of 3.2 - 4.7m.

### ProLine single rotor rakes

Offering working widths of 4.20m and 4.60m these rakes come fitted with the Kubota ProLine gearbox, with its maintenance-free oil bath solution.

### CompactLine twin rotor centre swath rakes

Kubota offers four cost-effective two rotor rakes with strong frames. The rakes produce a nice even centre swath from raking widths between 6.2 and 7.8m.

### Twin rotor ProLine rakes

Heavy-duty rakes with working widths up to 9.0m. They are designed for the toughest conditions and feature a high-performance oil bath gearbox and a strong carrier frame.

### CompactLine & ProLine centre swath rakes

Designed to make lighter work of tough conditions and boosts raking capacity with a 10.0 - 12.5m working width. These rakes master high capacity and easy operation by focusing on the elements that really matter.

### Four-Rotor ProLine centre swath rake

A productive rake that is designed for heavy and intensive use. The unique Kubota design comes packed with features, is adaptable and allows for an impressive working range between 9.80 and 15.00m.

### Key Features

- ✓ Adaptable rakes offering maintenance friendly systems
- ✓ Impressive working ranges
- ✓ Cost-effective and sturdy designs

## INTENSIVE USE IN ALL SILAGE CONDITIONS

Kubota BF3500 is the specialist baler for heavy silage conditions. The bale chamber ensures maximum bale density and superb bale rotation in all conditions. With the unveiling of FB1000 the art of round baling took a massive leap forward. A revolutionary non-stop round baler wrapper combination that cleverly integrates a pre-chamber with a main chamber and a wrapper.

### BF3500

This new fixed-chamber round baler is a high-capacity model developed for use in heavy silage conditions. It gets an 18-roller bale chamber, with two rollers located in the base of the chamber to give additional support with heavy, wet silage bales.

The BF3500 incorporates heavy-duty bale chamber rollers and driveline components. This includes a split driveline, with the bale chamber and feed rotor featuring 1.25-inch pitch drive chains.

### FB1000

The machine layout is truly innovative with two chambers arranged in series, allowing a number of rollers to be shared. Operating as a pre-chamber, the first section of Kubota FB1000 produces two-thirds of the bale. As the pre-chamber reaches its preset density, crop flow is diverted into the main bale chamber, allowing baling to continue.

Despite its non-stop capability, FB1000 is one of the most compact baler wrapper combinations available.

# Fixed Chamber Balers

# Variable Chamber Balers

## INTELLIGENT BALING WITH FIRST CLASS RESULTS

The all-new Kubota high-performance variable chamber balers, BV 5160 and BV 5200, feature the new patented PowerBind net and twine wrapping and Intelligent Density 3D software package for easy selection of bale density.

Kubota variable chamber balers offer truly intelligent baling with a clean raking 2.2m 5 tine bar pick-up, choice of intake system, programmable 'multi-chamber' bale density system and user-friendly ISOBUS compatible controls. The two versions offer bale diameters from 0.60m up to 1.65m and 2.00m respectively. The bale diameter is easily adjusted through the control terminal.

- Intelligent Density 3D with new easy setting of bale density – pre-selectable from the tractor cab.
- New PowerBind with direct net injection for fast and highly reliable netting.

- 2.2 m pick-up with small diameter.
- PowerFeed rotor intake for gives you an impressive intake capacity.
- SuperCut-14 and 25 knife rotors for efficient cutting and tight bales.
- DropFloor for easy unblocking.
- 3 different core densities, pre-selectable from the tractor cab.
- Easy and simple loading of net roll.
- ISOBUS control.

### Key Features

- ✓ Features new patented PowerBind net
- ✓ Intelligent Density 3D software
- ✓ 2.2m 5 tine bar pick-up

## INTENSIVE USE IN ALL SILAGE CONDITIONS

The latest Kubota BV5160-BV5200 Plus series FlexiWrap baler-wraper combinations feature similar upgrades to the solo baler models, designed to boost output and reduce maintenance requirements, keeping operating costs to a minimum. These new models feature a revised chassis design with a new drawbar and extensive detailing to reduce crop build-up. Upgraded wheel equipment and ISO compatible controls are also new introductions.

### The Advantages:

- ✓ Integrated solution for baling and wrapping in one go.
- ✓ Variable chamber bale concept with a bale diameter of 0.60-1.65/2.00m.
- ✓ PowerBind with direct net injection for fast and highly reliable netting.
- ✓ Wrapping table is transferred to the tailgate of the baler, so the bale is dropped directly onto the table.
- ✓ High speed wrapping with two prestretchers – wrapping process will always finish before the next bale is ready.
- ✓ Low table height for gentle unloading of bales. Optional bale on end kit available.
- ✓ The extra film rolls are lowered hydraulically for easy change
- ✓ The tandem axle with 560/45-R22.5 tyres (optional (710/35-R22.5) provides very good stability when operating in the field or running on the road.
- ✓ The extra film rolls are lowered hydraulically for easy change

### Key Features

- ✓ Come with all the features of the standard BV5000 series
- ✓ FlexiWrap system bales and wraps in one go
- ✓ Fast and efficient integrated baling

# FlexiWrap Baler-Wraper

# Bale Wrappers

## RUGGED DESIGNS FOR ALL WORKING CONDITIONS

Kubota Bale Wrappers come in three different ranges; Three-point mounted wrappers, trailed turntable round bale wrappers and trailed turntable wrappers. Each model offers you fast and efficient bale wrapping with rugged designs suited to all working conditions.

### Three-point mounted wrapper

Kubota WR1100 is a simple but very reliable way of wrapping silage bales. The WR1100 is ideal for 'wrap and stack' operations. When the bale is being transported to the storage site for wrapping, this three-point mounted version is the ideal solution. It can be mounted on the rear or front hydraulics of the tractor or used as a static machine with an external power pack.

### Trailed Turntable Round Bale Wrapper

The Kubota WR1400 is designed for smaller tractors. The machine is very easy to operate;

even the mechanical version offers fully automatic cut and tie of film. The hydraulically operated loading arm is positioned on the right-hand side and can handle bales from 1.20 m up to 1.50 m in diameter.

### Trailed turntable wrapper

The trailed Kubota WR1600 is ideal for users that wrap a large number of bales but still prefer the turntable wrapping system. It is designed for high output operation even in rough or hilly conditions. The Kubota WR1600 offers a rugged design and is capable of handling bales up to 1400kg.

### Key Features

- ✓ Three-point mounted wrappers
- ✓ Trailed turntable round bale wrappers
- ✓ Trailed turntable wrappers

# VERSATILE, RELIABLE, EFFICIENT!

The extensive range of Kubota choppers ensures there is a model to suit every operating requirement. Each model provides great results in a wide variety of conditions. All models are solidly constructed with a robust gearbox and rugged "V" belt transmission.

## SE1000 and SE3000 series

Kubota Choppers for green areas and vineyards come with working widths from 1.20-2.50m.

## SE2000 and SE2000P series

Side pivoting Kubota Choppers for road maintenance come with working widths from 1.55- 2.50m.

## SE4000 series

Multipurpose light choppers with working widths from 2.35-3.25m.

## SE5000-SE6000 series

Multipurpose Kubota Choppers with working widths from 2.35-3.20m.

## SE7000L-SE7000 series

Agri Kubota Choppers with working widths from 1.95 -3.20m.

## SE8000 series

Agri Kubota Choppers with working widths from 3.20-4.00m.

## Key Features

- ✓ Built for performance in even the most toughest conditions
- ✓ Reliable, robust and precise
- ✓ There is a model to suit every operating requirement you need

# TIM

## Tractor Implement Management

## RUGGED DESIGNS FOR ALL WORKING CONDITIONS

TIM (Tractor Implement Management ) is a cross-product and cross-manufacturer ISOBUS solution for the agricultural machinery industry, whereby the implement is able to control certain tractor functions. The key to this new technology is using the advantages of the overall system.

### Innovative technology

TIM enables the implement to automatically control certain functions of the tractor to optimise the quality and efficiency of the overall system.

### Certified solution

Kubota is the first manufacturer to receive the renowned AEF certification for a tractor/ implement combination.

### Powerful tractor/implement combination

Highly efficient combination of M7003 Premium KVT tractors and BV Series TIM round

balers makes an impressive combination for higher efficiency and optimised output.

### Optimization inside Kubota Farm Solutions

Kubota Farm Solutions: New ways to control and optimise operations by controlling the tractor via the implement.

### Multiple benefits

The TIM system offers decisive advantages, such as reduced driver fatigue, while at the same time increasing comfort and efficiency.

### Key Features

- ✓ Optimises the output and efficiency of the overall "tractor and implement" system.
- ✓ Increases operator comfort: automatic sequences replace manual operation and prevent excessive strain on the operator.
- ✓ The implement "knows" the process to be carried out and its operation process: sensors control the process while the tractor provides the combination.

## STRONG FRAMES WITH A LONG WORKING LIFE

Köckerling tillage equipment produce a range of robust tillage and cultivation machinery.

### Allrounder -classic-

The universal cultivator with a really low power requirement.

### Allrounder -profiline-

The universal cultivator with transport chassis.

### Allrounder -flatline-

The universal precision cultivator with an excellent contour adaptation.

### Trio

The Trio stubble cultivator is targeted at the farms with tractors from 100 – 160 HP.

### Quadro

The 4 bar universal cultivator for shallow stubble cultivation and deep soil loosening.

### Vector

The 4 bar stale seedbed cultivator for shallow working and for deep soil loosening.

### Vario

The stale seedbed cultivator with 8 tine bars for maximum working quality.

### Disc Harrows

#### Rebell -classic-

The mounted compact disc harrow

#### Rebell -profiline-

Heavy and compact with great results

### Key Features

- ✓ Robust machines for all working conditions
- ✓ Tillage equipment to suit all soil types
- ✓ All year round tillage

# Köckerling Tillage Equipment

**KÖCKERLING**

# Köckerling Seeding Equipment

## RELIABLE SEED PLACEMENT EVEN AT HIGH SPEEDS

Köckerling seeding equipment produce a range of robust tillage and cultivation machinery.

### Tine Drill

#### Jockey

The easy pulling and powerful drill for the modern arable farmer

#### Ultima CS

The universal drill for professional farmers

### Seeding Equipment

#### Disc Drill

#### Vitu

The disc drill for precise seeding

### Key Features

- ✓ Robust machines for all working conditions
- ✓ Seeding equipment to suit all soil types
- ✓ All year round seeders

## KÖCKERLING MODULES

Köckerling modules produce a range of robust tillage and cultivation machinery.

### Speed Drill

With Köckerling's Speed-drill small seeds can be drilled while the soil is being tilled. This saves passes, time and costs.

### Power Traction Kit

While working, the power traction kit gives additional weight from machine to rear axle of tractor which improves traction.

### Sternopack

The frontpacker Sternopack offers the best reconsolidation on ploughed land.

## THE SEEDING HARROW FOR PROFESSIONALS

Köckerling grassland cultivation equipment produce a range of robust tillage and cultivation machinery.

### Grasmaster

The professional leveller, aerator, re-seeder and over seeder for all pastures

Improving grassland requires various work. Opening up the sward in spring together with rolling are ways to raise the grassland quality.

For some years now much has been learnt about the effect of grass scarifying. The Grasmaster is a special scarifying harrow that removes all old grass, meadow grass, moss and weeds.

Molehills are levelled and dry dung pats are shattered. The massive cross-board leveller really works well levelling molehills and breaking clods when reseeded on ploughed ground to provide a level seed-bed.

The special spring steel harrow tines designed for grassland work are aggressive and remove the dead grass, dandelions and other broadleaf weeds. All tine fields are supported by a land wheel that permits precise ground

contact. A mounted seed drill is an option. The fan is powered by a PTO shaft to ensure a constant and strong flow of air which gives an even seed distribution. This can be difficult to achieve with an electrically driven fan. The metering wheel is driven by a spoked land wheel, the seed is delivered down 8 tubes into the tine fields where the vibration of the tines spread the seed all over the ground.

For many dairy farmers, the Grasmaster is the optimum machine for grassland maintenance and re-seeding. Increased profits of 15% are not unusual in the first two years. Critical for this effect is the timing of the overseeding operation. Warm damp conditions make the germination more certain. The growth of the new grass is impeded in dry conditions or by late frosts.

The grass varieties are also critical and should match the climate, altitude and be the right mixture for the prevailing conditions.

### Key Features

- ✓ Robust machines for all working conditions
- ✓ Tillage equipment to suit all soil types
- ✓ All year round tillage

## ATV & SIDE BY SIDE

Yamaha vehicles are designed to handle any environment and any desire. And because there's no such thing as a typical customer, Yamaha offers you the most diverse choice of ATVs, Utility Vehicles and Side-by-Side models. Built to work hard and play hard, these adaptable go-anywhere vehicles are ready to perform almost any role.

### Utility Range

Designed for farmers, foresters and industrial users who value quality and durability, Yamaha's trustworthy Utility models give you the power to make a wide range of daily chores easier and more enjoyable.

With their proven ability to perform a variety of tasks on the most challenging terrain, the Kodiak 700 and Kodiak 450 are some of the toughest and hardest working off road vehicles ever built. Rugged, reliable and comfortable, these user-friendly ATVs will transform your working day.

Finally, with its spacious 3-seat layout and pallet-size cargo bed, the Viking Side-by-Side is the easiest, quickest and most efficient way to get the job done - even in the most inaccessible locations.

### Leisure Range

With every Yamaha leisure vehicle you'll be able to discover many remote places that are out of bounds to most other vehicles.

Features include the industry-leading Ultramatic automatic transmission with all-wheel engine braking for a smooth and confident ride - as well as Yamaha's highly acclaimed On-Command system that puts you in full control by making it easy to switch between 2WD and 4WD.

With their impressive all terrain performance as well as user-friendly technology and outstanding ride comfort, the class-leading Grizzly ATVs can help you discover the wonders of the off road world - while the Wolverine 4-seat and 2-seat Side-by-Side models enable you to share the experience with family and friends.

# Yamaha

# Kubota M4072 delivers time-saving versatility

For beef farmer, George Potheary, the decision to replace his ageing tractor with a new Kubota M4072 from Lister Wilder was an easy one. His last Kubota had served him well for 17 years with exceptional reliability and he looked forward to enjoying the greater power and lift capacity of his new model, fitted with an LA1365 front loader. His high expectations have only been exceeded and he is delighted with every aspect of his new, slightly bigger workhorse.

With just over 100 acres and 50 head of Aberdeen Angus beef cattle to care for on his farm near Cricklade in north Wiltshire, George needs a robust and versatile tractor, capable of performing a wide range of tasks on a daily basis. His new Kubota M4072 is coping admirably with everything he asks of it, with the power, flexibility, and reliability he has come to count on.

Kubota's 74hp four-cylinder engine is quiet, economical and clean, and features high-pressure fuel injection to deliver maximum power and torque. The compact design of the Kubota M4072 provides exceptional manoeuvrability – an important feature on George's farm at times of year when it is deployed extensively in confined livestock areas. The LA1365 front loader adds versatility and efficiency to the package.

"I couldn't fault the performance I am getting from my new Kubota tractor," says George. "The additional power compared to my old one makes a big difference and all the improvements that have been made over the years make for a very comfortable, productive and efficient vehicle.

"Being able to carry out different jobs without having to change implements all the time is a great time saver and makes life a lot easier. During the winter months the cattle are kept in. With a four-in-one bucket fitted to the front loader I can switch from carrying silage bales across the yard at feeding time, to cleaning

out the barn and laying straw, then pick up a scraper in the bucket to scrape the yard, all with the minimum effort.

"The controls are well-laid out and straightforward to use and the cab is comfortable with great visibility all round. The integration of the front loader with the tractor is remarkable," George enthuses. "The buttons and levers are conveniently placed and easy to use. It really is a joy to drive.

"Another brilliant thing about this tractor is its turning circle. The way they have designed the front axle means I can manoeuvre in and around confined spaces with no trouble at all."

In addition to the work carried out each day looking after the farm's livestock, the Kubota M4072 with its front loader has also proved its worth pulling out and transporting fallen trees and other materials across the farm. "We had a lot of elm trees on the farm," explains George. "These were killed off by Dutch Elm disease and, although we have taken out a lot of them over the years, we still have more to deal with. I used to use a grab on my old tractor and the heavy lifting was something that pushed it to the limit, but I can manage it all with the four-in-one bucket on my new Kubota. Its additional power and lifting capacity make light work of the job."

The relationship George has with Lister Wilder is both long and strong. George has worked his Cricklade farm for 45 years, initially with his father, then on his own since 1982. "I have been

a customer of Lister Wilder for as long as I can remember, as my father was before me," he says. "I can remember them being part of our family's working life from the age of about ten! It's a company that I trust and know I can count on.

"When I decided to purchase a new Kubota tractor, I had no hesitation in turning to the local Lister Wilder representative for advice on which model would best suit my needs and I couldn't be happier with the M4072."

While George's experience of Lister Wilder's service has always been good, as a skilled mechanic he does most of the maintenance work on his machinery himself. Besides the farm, George has another passion in life – classic cars – and spent many years running an auto workshop alongside his farming activities. That business is still based on the farm but is now managed by George's son and his partners, although George, as a self-confessed 'petrolhead', still gets involved in specialist work tuning the classic cars he loves.

"While the new model is more complex than our previous tractor, I am pleased to say that Kubota have retained a lot of the 'mechanical elements' which I like," he says. "The mechanics are straightforward and robust, delivering high performance without being so hi-tech that you can't understand them and work on them. I really can't fault the Kubota M4072. It is just the job for me!"

For all the large-scale machinery at their fingertips, they nonetheless foresaw a need for something nippy that could ferry them and their tools quickly around their 200-acres at Upper Seagry near Malmesbury in Wiltshire. The answer, they decided, would lay in a Kubota RTV X-1110 from Lister Wilder's nearby Cirencester branch.

The all-new multi-purpose vehicle offers greater power and more versatility thanks to a powerful and economical 24.2 HP Kubota 3-cylinder liquid-cooled diesel engine. Thanks to its unique drive train arrangement, it goes where other utility vehicles can't and get's there in infinite safety courtesy of innovative variable hydrostatic transmission and dynamic engine braking. With its rapid acceleration and gripping traction, it can stop and then resume climbing without the need for braking.

Ergonomically designed for effortless operation and optimum driver and passenger comfort, the RTV X-1110 features deluxe split-bench seats, digital easy-read instrument panel, and under-seat storage with full ROPS protection designed for easy access to a hydraulic cargo tipping bed.

The Leighfields' dairy farm has 120 milking cows at the heart of a business that has expanded successfully into contracting. The family team offers its contracting customers a range of services including silage making using a self-propelled forager while also running a baler making round and square bales.

Through a typical farming year, the Leighfields will also handle hay making, tanker-based slurry spreading and full ground works from ploughing through to cultivating, rolling and drilling. They also find time for hedge cutting and ditching.

Paul had long experience as a herdsman when he and Julie decided to apply for a tenancy to ensure their long-term future in the industry they love. They got the second tenancy they applied for - at Lyneham in Wiltshire - and worked there for ten years before moving to their current 150-acre farm at Upper Seagry in 2005. Further private lets takes their total holding to some 200 acres.

Soon, Richard and Edward piled their energy into the business and contracting became possible on a bigger scale. "Though I had worked for a long time as a herdsman, I have always been involved with machinery, so we did our own ground work from the start and took on silage making as one of a group of four farmers sharing one bit of kit," says Paul. "Nowadays, we work for dozens of farmer customers and cover a radius of up to 20 miles."

The sheer success of their contracting business soon posed them a big question. "We got to a point where we actually asked ourselves whether we should give up the cows because we needed more time," admits Paul. "But then we bought ourselves a milking parlour in a farm sale, got it re-galvanised and installed, and it's totally transformed our operation. We

can now do the milking in an hour as opposed to two-and-a-half hours previously, which means we can be on site for a contracting customer by 8am when we need to be."

It adds up to a "ludicrously busy" schedule at key times of year but, with Julie able to run the milking parlour on her own if need be, they cope very well.

It does, however, mean that time spent around the farm is precious - and that's where the Kubota RTV comes in. "We had been after one for a time but never done much about it until Richard happened to meet Bryn Kinsman (Area Sales Manager) from Lister Wilder," says Paul. "Now I'm glad we did! We use it in the main to get around the farm setting out electric fencing, but the fact that it's road legal also means that it can be used to ferry spares when we are out contracting. The load capacity is great for fencing and ditching equipment, and for transporting fresh batteries for sheep keep."

He adds: "In the summer, we use it three or four times a day checking on sheep that we take in to graze. And if you have a cow that happens to calve out in the field we can simply pop the calf in the back to get it back to the farm with the mother following."

His conclusion: "We are delighted with it and very happy with the service Lister Wilder give us. We have known them for many years and they are always very helpful."

# Kubota RTV saves precious time

Combining dairy farming and contracting into one successful business often means moving at speed through a hectic day for Paul and Julie Leighfield and sons Richard and Edward.

Left to right, Julie, Edward and Richard Leighfield.

# Kubota has all the stock answers

**With feed costs spiralling and big challenges in selling the product, the pig business is tougher than it's ever been. Mike Marks is very clear that, for him, maintaining a successful farm depends on working hard, being organised and mechanising wherever he can.**

Operating from rural Gloucestershire, Mike somehow manages to run a herd of between 500 and 600 pigs single-handed. The support he does have comes from a small fleet of machinery in which he puts huge reliance on Kubota as a brand he trusts and Lister Wilder as a dealer that gives him a high level of support. Working with the Bibury Branch, he has invested in recent months in an M5092 loader tractor and also has a Kubota scraper tractor, an articulated loader and a diesel ride-on mower.

"I like the reliability that Kubota gives me and the fact that they are simple with minimal electrics," says Mike, who originally ran the farm with father Ron but has been on his own for the last 22 of his 40 years in pig farming. "You pay a lot more money for all that computerisation and I simply don't need it.

"The 5092 is a good stockman's tractor," he adds. "The main reason I went for it is that it is highly manoeuvrable, and that's key given how tight it is here. I use it for getting the straw in from the barn and the muck out for stacking in the field before it goes off to another farmer. Given the price of fertilizer, it's a valuable resource."

With its powerful engine, excellent transmission, high ground clearance and exceptionally simple operating controls, the 5092 is recognised as indispensable for daily routines like those that Mike follows. While he isn't in it for too long at a time, the comfortable and generous cab provides an optimal panoramic view.

The engine is optimised for performance and torque while simultaneously lowering the engine speed level. In its latest manifestation, it now runs more quietly, offers greater wear resistance and lower fuel consumption.

Recurring tasks using PTO are an inevitable part of Mike's existence. That is where the integrated speed memory comes into play, allowing you to recall each setting with just the touch of a button and without any further adjustments.

Maintenance is fast, convenient, and efficient - and is looked after by Lister Wilder. "Equipment is no good to me if it breaks down," he says. "If it breaks down I have got to have it up and running again very quickly and Lister Wilder make sure that happens."

The tractor's one-piece bonnet opens wide, allowing easy, unhindered access to all maintenance points. Filling up is just as easy as maintenance. The 105-litre diesel tank and the 12.3-litre AdBlue tank can be safely and conveniently filled from the ground.

For Mike, the Kubota / Lister Wilder combination helps to make a busy life work. "People say I have a lot of mechanisation for a small place but it's worth it to me," he says. "Everything is in the planning and I reckon I have it pretty well sussed."

## RELIABLE SOLUTIONS FOR DEMANDING PROJECTS

Kubota have gone to great lengths to supply you with a host of different options. You can select from a range of categories, these articulated units will make quick work out of even the most challenging scenarios. All of our products are built to last and engineered to meet the highest of standards, so reliability is never an issue. Efficiency and durability are guaranteed.

### Excavators, Loaders and Dumpers

From leading-edge engineering to innovative technology the Kubota construction range benefits from an earned reputation for legendary reliability, outstanding performance, advanced security and excellent residual value. Designed and built to produce cost-effective results time after time. Almost all the range is powered by Kubota engines – proven, reliable, and clean running. These highly durable engines are designed to provide maximum fuel efficiency, minimal noise and vibration, and have low emission levels that meet all environmental regulations.

### Key Features

- ✓ Leading edge engineering
- ✓ Innovative technology
- ✓ Exceptional fuel economy
- ✓ Efficient operation

# Groundcare

## HIGH QUALITY MACHINERY

Lister Wilder have been supplying the highest quality farm, groundcare and estate machinery for over 60 years. One reason for our steady growth has not only been the quality of our staff but also the strength of our products. More and more people are looking for good quality groundcare machinery that can be fully supported, as well as being competitively priced. We can provide that as well as a huge range of Groundcare machinery to cater for every application and industry.

### Mowers

Kubota mowers meet all the needs of experienced professionals and estate users alike thanks to their comfort and efficiency as well as their manoeuvrability and reliability.

### Compact tractors

With almost 30 makes of tractor on the market, the choice can seem daunting. Our advice is to stick to names that are known and trusted within the industry. This way you can be sure of good aftersales service, the quality of the engineering and perhaps most importantly the re-sale value of the product. Kubota is the most respected name in compact tractors and is the preferred choice for thousands of professional users worldwide.

### Utility vehicles

On steep slopes and over rough surfaces, the Kubota Utility Vehicles offer 4-wheel drive that adapts to all situations. There are several models, including two petrol versions (400 and 500 cc) and one diesel (900 cc) to meet all your needs.

### Implements

Kubota offers an extensive package of effective and efficient implement solutions. The Kubota Implement range includes a large variety of machinery which specialises in mowing, collecting, handling, spreading, cultivating and much more.

The UK's ONLY full line Kubota dealer!

### Key Features

- ✓ Exceptional comfort
- ✓ Unparalleled efficiency
- ✓ Proven reliability
