About Lister Wilder

Lister Wilder is a family business supplying high quality golf course and groundcare machinery for over 60 years. For the last six decades we have steadily grown by providing a professional, but friendly service.

We have six branches across the South of England and 180 team members that are involved with selling and supporting golf and groundcare machinery. Each branch is focused on supporting customers in the local area and has its own dedicated team of sales, workshop and parts personnel.

With an expanding range, this brochure highlights the very latest golf course machinery available. If you would like more details or to book a demonstration of any of the machinery, please contact your nearest branch.

Key for Symbols

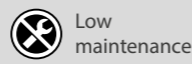

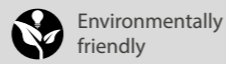

Low arm vibrations

Low noise

Low maintenance

Environmentally friendly

STIHL® BG86

Hand held blower

Great little hand held blower for blowing off smaller areas such as around tee boxes, benches and machinery. Can also be strapped on the ride on mower incase loose grass drops onto cart paths. New HD2 filter for dusty areas. With optional round nozzle or flat nozzle, 2-MIX engine, locking throttle lever with stop button.

STIHL® BR600

Powerful back pack blower

The reliable back pack Stihl blower is for larger areas and areas where leaf fall is particularly heavy. With very high air throughput for the most extensive clearing tasks. Superb power to weight ratio. Excellent anti-vibration system and ergonomic carrying frame. Innovative 4-MIX® engine for a more pleasant sound, low fuel consumption and low emissions.

STIHL® FS360

A high end robust strimmer

Powerful enough for ditchlines and long rough but not too heavy to cause fatigue with constant use. Stihl 4-point anti vibration system, Stihl ErgoStart, multi-function handle, bike handle, tool-free handle adjustment, 2-MIX engine, Stihl M-Tronic.

STIHL® FS 91 R

Loop handle strimmer

A lighter weight strimmer for smaller jobs should as around bunkers, benches and golf course signage. Supplied with AutoCut mowing head as standard.

STIHL® MS261

Petrol chainsaw 20" bar

This saw is the perfect tool for small to medium tree maintenance. Light and well-balanced, it delivers plenty of power whilst the M-Tronic technology controls the fuel and air mix so the machine is always at optimum performance. The Stihl anti-vibration system significantly reduces vibrations at the handles for comfortable use throughout the day.

Low arm vibrations

Low noise

Low maintenance

Environmentally friendly

Husqvarna® 525iB

Battery powered blower with a similar amount of blow than the petrol version

Powered by Husqvarna's powerful BLi backpack battery, the handheld 530iBX blower is low in weight but big on all-weather performance. Full of smart features including an intuitive keypad, optimised ergonomics, improved cruise control and boost mode, all designed to maximise uptime and productivity.

Husqvarna® 535iRXT

Battery power strimmer similar performance 35cc petrol engine

Robust, light weight and well balanced. Fantastic for bunkers edges and golf course signage with its dual directional head. The E-TORQ motor and 45cm cutting diameter deliver the performance you need to get the job done on time.

Husqvarna® T535i XP®

Battery powered chainsaw

A powerful 36V battery powered chainsaw for professional pruning. For use with 12/14" guide bar. This battery-powered chainsaw is superb for all-round pruning, trimming, climbing, and clearing jobs. Ideal for professional arborists who want a cordless electric top-handle chainsaw with low weight, high chain speed and excellent ergonomics.

Husqvarna® 530 PT5

Battery powered long reach pole saw

Telescopic battery pole saw for professionals, with 5m telescopic reach and performance that surpasses petrol equivalents. Maximum performance and durability with low weight, excellent ergonomics and quiet operation for use in any location at any time of day.

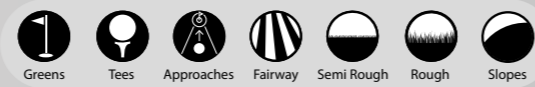

Husqvarna® 520iHD70

Battery powered two sided hedge cutter

Powerful yet lightweight and well-balanced battery-powered hedge trimmer for commercial use with 70cm double-sided cutting bar that gives you a great range. The pivoting rear handle makes it easier when cutting both vertically and horizontally.

Pedestrian Cylinder Mowers

BARONNESS LM56

A 22" fixed head greens cylinder mower, lightest in its class, well balanced and highly manoeuvrable
 Completely gear driven without belts and boasting a industry leading 5 year warranty. The nickel chrome molybdenum alloy steel cutting reel keeps it on cut longer with less regrinds and bedknife replacements. A Honda engine makes the perfect Japanese partnership.

HONDA ENGINE

BARONNESS LM101

A 22" floating head greens cylinder mower, well balanced, manoeuvrable - great for undulated greens
 Gear driven and 5 year warranty. The nickel chrome molybdenum alloy steel cutting reel keeps it on cut longer with less regrinds and bedknife replacements. A Honda engine makes the perfect Japanese partnership.

HONDA ENGINE

BARONNESS LM66

A 26" fixed head tees and approach cylinder walk behind mower, lightest in its class, well balanced and highly manoeuvrable
 Completely gear driven without belts and boasting a industry leading 5 year warranty. The nickel chrome molybdenum alloy steel cutting reel keeps it on cut for longer with less regrinds and bedknife replacements. A Honda engine makes the perfect Japanese partnership.

HONDA ENGINE

BARONNESS TR50

For use with Baroness, LM101, LM56 and LM66. Specially designed for Baroness mowers
 A one step locking ramp for easy loading/unloading whether you load with the wheels on or off the mower. The mower head is elevated and does not come in contact with trailer bed maintaining height of cut and the gap between the cylinder and bedknife over uneven buggy paths.

Pedestrian Rotary Mowers

HAYTER Harrier 48 PRO

Pedestrian 18" roller mower
 Featuring Crank-Safe Blade Brake Clutch (BBC) system, all-new cast aluminium cutter deck, and Honda GCV160 engine. Designed for commercial mowing.

HAYTER Harrier 56 PRO

22" pedestrian roller mower
 Blade Brake Clutch with Crank Safe system, a steel roller differential and bearing system. Powered by Briggs and Stratton. Heavy duty wheels and handles for lifting.

LAWNFLITE 448HW

18", self propelled four wheeled rotary mower
 Commercial, Honda driven, self-propelled drive and a speed of 3.9 km/h and features a blade brake clutch.

LAWNFLITE 553HWS-PRO

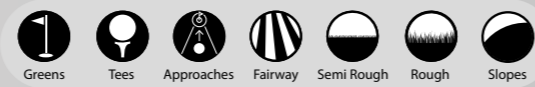

22" self propelled four wheeled rotary mower
 Two speed shaft-driven. Features include rust-resistant alloy cutter-deck, steel deck-liner, strengthened handles and front bumper with Blade Brake Clutch.

Husqvarna GX560

20" hover mower
 With its air cushion technology, it delivers premium results on steep areas, such as bunker edges up to 45°.

Electric Greens Roller

The Electric EGR Roller from Salsco is the result of years of testing and improvement. Both 36" rollers are driven, each with its own gear box and electric motor. There is easy access to all electricals with a self-diagnostic controller. The speed is variable, up to 11.9mph. The Electric Greens Roller comes with a 36V lithium battery pack which is able to roll 27 greens on a single charge. The battery requires no maintenance and the projected life span is 10 years! Roller brushes are fitted as standard to reduce drop off from top dressing and grass clippings. This significantly saves time on cleaning up after rolling up to nearly 95%. 5 year limited warranty. LED lights included.

- ✓ 36V lithium battery!
- ✓ Dual drive oscillating rolls for positive traction
- ✓ Articulating steering
- ✓ Automotive type tilt steering wheel
- ✓ Forward/reverse seat slide
- ✓ LED light kit
- ✓ P.S.I. EGR (with lithium battery) = 7.6 without water added to the rolls, 9.0 with water added to the rolls

Petrol triple greens roller

The fastest and most productive roller the golf market has to offer. The widest 73" width of work and fastest 11mph. Roll 19 greens in just over two hours. Three driven rolls oscillate and articulate guaranteeing 100% roll-to-ground contact with better climbing and reduced slipping qualities. The HP11-III travels over the ground following the undulations designed into the turf and smooths the surface without changing it. Roller brushes are fitted as standard to reduce drop off from top dressing and grass clippings. This significantly saves time on cleaning up after rolling up to nearly 95%. 5 year limited warranty. LED lights included.

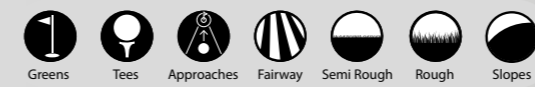

- ✓ 13hp Honda electric start engine
- ✓ 12-volt battery
- ✓ 6-gallon, CARB-approved fuel tank (standard)
- ✓ Engine cooling fan
- ✓ Three steel rolls that oscillate and articulate when driven
- ✓ Roll housings articulate at different degrees of travel, which allows turning without bruising
- ✓ All three rolls drive and float independently which allows for 100% roll to ground contact
- ✓ P.S.I. = 7.0 without water added to the rolls, 9.2 with water added to the rolls
- ✓ 73" rolling width = productivity
- ✓ You can add water inside rolls to increase PSI
- ✓ 100% roll-to-ground contact
- ✓ Traction without slipping
- ✓ Incredible climbing traction, up to 40°
- ✓ Increased speed
- ✓ Hydraulic steering
- ✓ Automotive type steering wheel
- ✓ Do more than roll with our accessories
- ✓ Transport trailer is standard

Greens roller

14hp Kohler engine with electric start. 40" working width, LED lights, trailer with ramps and automatic chain tensioner for drive rollers. 4 x articulating drive rollers for grip on slopes and contour following.

Triple cylinder mower

The LM311 is completely hydraulic including the blades which are also hydraulically driven. The rotation speed of the blade can be adjusted steplessly, allowing you to smoothly and quickly change the rotation speed according to the grass conditions. The LM311 is available in 11 and 7 blade unit options.

Greens and tees triple mower

Building on tried and tested technology, the new Baroness LM315 greens mower gives you all the advantages of a hybrid drive mower, with the reliability of mechanical drive to the cutting units, a choice of reel speeds and the best cutting units in the business, with the added benefit of a reliable Kubota diesel engine and 7 and 11 blade options.

Tees and surrounds triple mower

9 and 11 blades units with selectable 2 and 3WD mower powered by a hydrostatic system. The simple design allows it to hug all the contours and undulations around the bunkers and surround areas. Equipped with precision engineered sharp reel cutters.

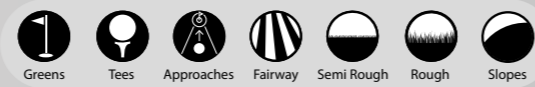

Triple cylinder mower

A lightweight triple mower with an excellent turning radius for a 4 wheel drive machine and good grip on slopes. 26" units follow the undulations superbly and the 4WD cross circuit hydraulic drive system and low centre of gravity design, allows excellent climbing power and movability, all with a solid fuel saving 25hp Kubota engine. Available on 5 and 7 blade units.

Ride On Cylinder Mowers

BARONESS LM551

Premium fairway mower

The 'Flag Ship' Baroness fairway mower. Equipped with a 22" (2.5m width of cut) contour hugging units or more productive 26" units (2.8m width of cut). The most comfortable seat in the business gives the operator the best platform. Swing out rear units provide excellent maintenance and servicing access. The 45hp Kubota engine ensures enough power for hills and heavy cutting conditions.

BARONESS LM3210

Largest and most productive fairway mower

The LM3210 is heavy-duty and the most productive 5 deck fairway mower on the market at 3.2m width of work. Boasting a 60hp reliable Kubota engine giving all the power needed for the toughest conditions. Swing out rear units provide excellent maintenance and servicing access. The most comfortable seat in the business gives operator the best platform.

BARONESS LM531

Light weight fairway mower

Lightweight fairway mower with 22" units at a 2.5m width of cut that will follow the undulations superbly with less marking of the turf. The 4WD cross circuit hydraulic drive system and low centre of gravity design, allows excellent climbing power and movability, all with a solid fuel saving 25hp Kubota engine.

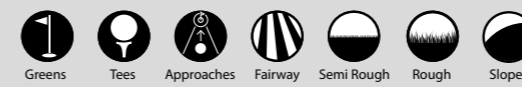

BARONESS LM180E

Surrounds slope mower

Powered by a reliable Mitsubishi 9.8hp petrol engine, the LM180E has the power and flexibility to cope with long grass, short fine turf and where a fast, high output is needed. The reduced gear drive from the engine with the differential lock, makes it flexible and stable at low speeds on inclines.

Ride On Rotary Mowers

BARONESS GM1700

Rotary slope mower

This rotary slope mower has a low centre of gravity and pivoting seat which allows it to cut banks up to 25°. The GM1700 can be fitted with three different cutting decks (contour, side discharge and mulching decks). This problem solving mower increases the presentation of banks in high sloped areas.

BARONESS GM2810

Pod deck rotary mower

This premium ride-on rotary mower comes with five rotary decks individually following hilly terrains and slopes, leaving an elegant finish even on undulated areas of the golf course. A market leading 60hp Kubota powers this beast and with selectable 2/4WD, weight transfer and differential lock you always have the preferred traction wherever you go.

Kubota F-251

Outfront rotary mower

This Kubota is fitted with a robust 60" outfront rotary deck. With 25hp to back it up, it still has a light footprint but more than required power. Selectable 2/4WD is advantageous on fine turf as you can select 4WD if the terrain requires it but 2WD if the areas are flatter reduces scuffs. Perfect for semi-rough areas.

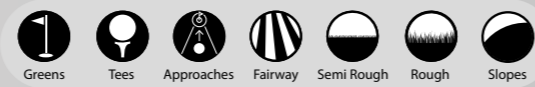

Kubota ZD1211

Zero turn rotary mower

The diesel Kubota zero turn with a productive 60" deck. Zero turn mowers are exceptionally manoeuvrable and the mower of choice when obstacles are in the way. With a robust 140mm deep mower deck and rear discharge this machine copes well dispersing the grass evenly through its baffle plates.

Ride On Rotary Mowers

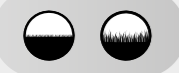

Kubota G231-HD

HIRE ME

Mid mount cut and collect rotary mower

A 23hp Kubota high tip cut and collect machine can collect short or long grass and leaves. The 48" deck is made to a commercial specification and with the direct collection between the rear wheels blockages are rare. The high tip function enables the machine to tip into trailers and onto compost heaps.

Kubota FC3 & FC4

The new Kubota ride on cut and collect

The newest of the Kubota stable, featuring a 50hp Kubota diesel engine with 4WD hydrostatic transmission. Boasting a 1,300 litre fuel capacity. A suspended operator platform combined with an air suspension deluxe seat provides optimum operator comfort. Flail and rotary deck options available with hydraulic height of cut adjustment. Heater management is also available.

Tow Behind Rotary Mowers

trimax Snake

Tow behind rotary mower

Designed specifically for sports turf and golf courses. Trimax have seamlessly combined their world class cut quality and articulation capabilities, and created the best sports turf rotary mower in the world. Able to be used on fairways (cut down to 10mm) as well as rough areas due to its contour following ability.

Available in 3.2m or 4m widths

Tow Behind Rotary Mowers

trimax Pegasus S5 493

The Trimax Pegasus S5 is second to none

A wide-area mower that guarantees high-quality cut and finish. Its fast spindle, deep mowing and articulating decks ensure a consistent cut over light to moderate contours. The latest version is stronger and more efficient than its predecessor, making it perfect for commercial applications with minimal downtime.

Ride On Flail Mower

trimax FlailDek

Outfront flail deck

This can fit on the front of the Kubota F-series. The FlailDek has a unique convertor flap which allows it to be suitable for both longer scrub areas, and then still give a great finish on shorter grass. 1.55 metres width of work.

HIRE ME

Roberine F5

Five unit flail deck

A true workhorse with 5 individual floating flail decks. Ideal for rough areas where contour following is essential. The flail heads cut and mulch without rowing up longer grass which can look unsightly. 63hp provides the power needed to tackle thick grass over 12" where rotary mowers would struggle.

aebi schmidt Terratrac

Specialised slope flail mower

Made in Switzerland and possesses the ability to climb slopes and perform where others fail. Available in 75hp and 109hp and usually combined with a flail for those hard to reach super steep slopes over 35°. Very versatile as there are PTO on the front and back of the machines as standard. Hedge cutters can also be used on these.

Bunker Bike

BARONESS SP05

Petrol bunker rake

The Baroness SP05 bunker rake is designed to adapt to all kinds of bunker conditions with power steering, switchable 2WD/3WD drive, low centre of gravity and side-to-side and up-and-down moving rake.

A mid mount cultivator pack is available for renovation jobs.

BARONESS SP160E

Electric bunker rake

Battery version of the Baroness SP05 bunker rake. No petrol, no noise and more environmentally friendly. No problems for neighbours with the early morning starts. Selectable 2/3WD.

Mid mount cultivator pack is available for renovations jobs.

Utility Vehicles & Buggies

Kubota RTV 520

HIRE ME

Medium duty utility vehicle

The perfect little run around for course set up. Powerful 18hp twin cylinder Kubota petrol engine. One of quietest petrol engines on golf course reducing noise levels for golfers and neighbours. Turf saving variable hydrostatic transmission with selectable 4WD makes this a go anywhere utility vehicle.

Kubota RTV-X1110

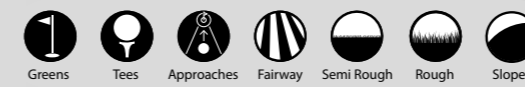

HIRE ME

Heavy duty utility vehicle

The big brother to the RTV520. Powerful 3-cylinder 25hp Kubota diesel is one of the most reliable 4x4 on the market. Hydraulic tipping bed for all the heavy duty workloads. Turf saving variable hydrostatic transmission with selectable 4WD and diff lock makes this the ultimate utility vehicle for golf courses.

Utility Vehicles & Buggies

Kubota RTV-X1140

HIRE ME

Heavy duty 4 seater utility vehicle

Truly versatile with the ability to comfortably carry two or four people. Able to change between these in under a minute and without tools. Powerful 3-cylinder 25hp Kubota diesel is the most reliable 4x4 on the market. Hydraulic tipping bed for all the heavy duty workloads. Turf saving variable hydrostatic transmission with selectable 4WD and diff lock makes this the ultimate utility vehicle for golf courses.

YAMAHA UMX

Light duty electric utility vehicle

Fully electric workhorse powered by Trojan batteries. With its large rear cargo bed and spacious front locker, this quietly efficient all-electric workhorse can handle a huge range of tasks, indoors or out. The UMX AC is emission-free of course, as well as being very easy to drive and operate. Fantastic for course set up in noise restricted areas.

YAMAHA Golf Buggy

Electric and petrol

The most comfortable ride on the market for the customer with its independent suspension, larger customer seat and seating area. Available in petrol or AC electric with its regenerative braking ensuring two rounds of golf on one charge. Available with Yamatrack for speed, area restrictions and GPS tracking for antitheft.

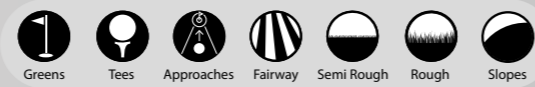

YAMAHA Grizzly Quadbike 300

Petrol quadbike

With selectable 2WD and 4WD drive you can save your turf and the diff lock help you get out sticky situations. This will go through just about any terrain a golf course can throw at it, such as boggy heather areas, steep slopes with loose terrain whilst also being available to spray. The natural all wheel engine braking is a fantastic safety features when going to down steep slopes.

Autonomous Mowers

Husqvarna CEORA™

Professional large-scale turf care

The next-generation robotic mower, CEORA™, is the ultimate solution for all green space professionals handling large turf areas. With systematic cutting and virtual boundaries.

This ground-breaking innovation is easy to use and has a very large area capacity. It's also low in noise and emission-free when in use.

It can cover areas up to 75,000m² and has the ability to cut systematically in parallel tracks. This means CEORA™ is equally efficient whether managing football pitches or any other large green space. By only cutting a small amount each time with frequent, systematic high precision, the results are perfect.

Tractors

Kubota B2261

Light weight and versatile 26hp tractor

3-cylinder hydrostatic or geared Kubota diesel. With Bi-Speed Turn giving this tractor the best turning circle in its class. Selectable 2WD and 4WD with diff lock. Market leading 970kg lift capacity on three point link. 33 litres per minute hydraulic pump. Loader ready.

Kubota LX-401

Available in 35 and 40hp with a ROPS or cab. Specially designed multipurpose tractor

Powerful 4-cylinder Kubota diesel with selectable 2WD and 4WD with diff lock. 3 stage HST transmission with cruise control. 1150kg lifting capacity on three point link. Loader ready.

HIRE ME

Tractors

Kubota L1-Series

Mid-chassis 38 - 52hp with ROPS/HST/manual

Cableless tractors ranging from 38 to 55hp. 3 and 4-cylinder engine available. Powerful and lighter than the cabbed L2 series. A true mid size tractor. Available in HST or with manual transmission. Selectable 2WD and 4WD with diff lock. Lifting capacities from 906kg to 1750kg and the three point link and hydraulic pump capacity from 30 to 37 litre per minute. Loader ready.

Kubota L2-Series

Mid-chassis 45 - 62hp with cab HST/manual

Fully air-conditioned cabbed tractors from 45hp to 62hp HST or geared. Selectable 2WD and 4WD with diff lock. 4-cylinder Kubota diesel. A true mid size tractor. Able to lift and use a 1.6-1.9 Verti-Drain's across greens and fairways alike. 1750kg lifting capacity on the three point link and a 37 litres per min hydraulic pump capacity. This tractor also comes loader ready.

HIRE ME

Kubota M4073

Large chassis tractor 73hp

A large chassis, 4-cylinder Kubota diesel tractor with 73hp. Able to lift and work a 2.1m Verti-Drain comfortably. A real work horse available in 18x18 or 36x36 gear boxes. 40kph top speed. Fully air-conditioned cab. 2500kg lift capacity on three point link. 63 litres per min hydraulic pump capacity. Loader ready.

HIRE ME

Also available as M4063 – 64hp

Kubota M5092

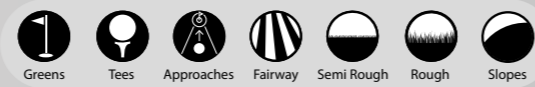

Large chassis tractor 95hp

A large chassis, 4-cylinder Kubota diesel tractor with 95hp. A 6 speed synchronised gear box with 3 ranges. Able to work a 2.6m Redexim Verti-Drain and Vibra Sandmaster comfortably. Selectable 2WD and 4WD with diff lock. 64 litres per min hydraulic pump capacity. 4100kg lifting capacity at three point link. Fully air-conditioned cab. Loader ready.

HIRE ME

Also available as M5111 – 110hp

Redexim Verti-Drain Carrier & 1513 Pedestrian Corer

Pedestrian aerator

The multi-function tool carrier designed for a variety of implements such as aerators, seeders and verti-cutters. With the 1513 Verti-Drain connected it functions as a self-propelled aerator. Penetrating up to 150mm with adjustable heave settings. Used with both solid/hollow tines. The ground pressure per square centimetre amounts to an impressive 0.45kg perfect for minimum disruption on tees and greens.

HIRE ME

BARONESS TDA 1200/1600

Tractor mounted aerator

These extremely effective aerators are available in 1.2m - 1.6m working widths. Light enough to be used by most compact tractors and built with the reliability of all Baroness products. The working depth of both solid and coring tines is up to 180mm.

Redexim Verti-Drain 7212

Tractor mounted aerator

Light weight but robust. 1.2m working width and 25cm working depth. Suited to low HP tractors, areas with poor access or sensitive turf. The three speed gear box enables the operator to get the optimum aerator pattern by matching it with forward speed.

Redexim Verti-Drain 7316

Tractor mounted aerator

A three speed gearbox lets the operator get the optimum pattern by matching it with forward speed. There's a PTO slip clutch, solid/hollow coring tines available, 12" working depth and 1.6m working width.

HIRE ME

Redexim Verti-Drain 2519

Tractor mounted aerator

The fastest most productive Verti-Drain ever produced. With a working width of 1.9m and a working depth of 25cm this machine is the most productive in its class. Light enough to be taken on greens and tees and robust enough to contend with fairways and semi rough.

HIRE ME

Redexim Verti-Quake

Tractor mounted aerator

Available in two working widths of 1.6m and 2.1m. It vastly improves drainage, root development, the uptake of moisture and nutrients. Four models are available, with a working depth up to 38cm. The Verti-Quake decompacts the soil via rotating off-set blades, shattering it laterally beneath the surface.

Redexim Verti-Drain 7521

Large range Verti-Drain with a 2.1m working width punching holes down to 40cm (16 inches)

The three speed gearbox lets the operator get the pattern by matching it with forward speed. There's a PTO slip clutch and solid/hollow coring tines available.

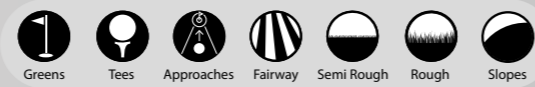

Redexim Verti-Drain 7626

Tractor mounted aerator

The largest aerator on the market. With a 2.6m working width punching holes down to 40cm. The three speed gearbox enables the operator to get the optimum aerator pattern by matching it with the forward speed. There is a PTO slip clutch for protection. Solid and hollow coring tines available.

sisis Multislit

Tractor mounted slitter

With a 1.5m working width this is a very quick and productive machine leaving minimal surface disruption. Choice of interchangeable tines to suit ground conditions. Rear roller to flatten plucking and leave a striped appearance.

30hp minimum tractor requirement

sisis Maxislit

Tractor mounted slitter

With a 1.8m working width and a working depth of 9" this is a very quick and productive machine leaving minimal surface disruption. Choice of interchangeable tines to suit ground conditions. Rear roller to flatten plucking and leave a striped appearance.

35hp minimum tractor requirement

sisis Megaslit

Tractor mounted slitter

With a 2.5m working width and a 12" working depth this is a very quick and productive machine leaving minimal surface disruption. Choice of interchangeable tines to suit ground conditions. Rear roller to flatten plucking and leave a striped appearance.

40hp minimum tractor requirement

Brushes

sisis Varibrush

Tow behind stiff brush

The multibrushing action reduces the number of passes made. Great for working in topdressing, standing up grass and grooming. Reversible frame to change the wear. An electric actuator lifts/lowers bristles.

sisis Flexibrush

Tractor mounted fairway brush

5.4m working width with individual contour following 'V' shaped heads for maximum turf engagement. Hydraulic fold up and down wings for access and storage. Cost effective and the best stiff bristle brush for fairways and semi rough areas. Good for worm casts and grooming.

20hp minimum tractor requirement

Redexim Speed-brush

Tow behind top dressing brush

The towed Redexim Speed-Brush uses land drive to rotate the two independent soft bristle brushes against the direction of travel. This sweeping action works sand & other materials into holes and grass sward making the surface immediately playable. The brushes can also be angled to move the loose material inwards. For storage the Redexim Speed-Brush can be stored away up right to save space. In addition, electric actuator lifts and lowers the bristles into working positions.

HIRER ME

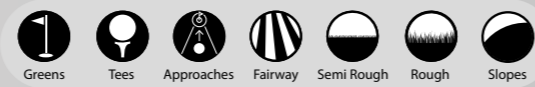

Redexim Top-Brush 6000

Tractor mounted fairway brush

The Redexim Top-Brush has three independently adjustable articulating brush units, the hydraulically powered brushes float to follow contours which can be rotated in either direction. The Top-Brush is ideal for dispersing worm casts, disease control, general surface preening, pre-cut preparation as well as the brushing of top-dressing materials on the surface of your turf.

Minimum 40hp tractor requirement with 35 litres per minute hydraulic pump.

sisis Rotorake TM1000

Tractor mounted scarifier collector

Specially designed for tractor mounted work. Choice of 5 quick release interchangeable reels. Contra rotating reel for a clean consistent performance. The weight of the collection box is carried by the main frame on front roller so it does not add more weight to the scarifying head. Working depth 50mm. Working width 1m.

20hp minimum tractor requirement

Redexim Verti-Cut 1600

Tractor mounted scarifier

Ideal for deep scarification. 2mm wide blades can work down to a depth of 50mm. The front roller allows the deck to cope with undulations but it also controls the working depth. Blade spacing can be changed with the optional spacer kit depending upon ground conditions. 4mph working speed, 30mm between blades and a 1.6m working width.

HIRE ME

45hp minimum tractor requirement

ALSO AVAILABLE IN 2M WORKING WIDTH

sisis Veemo

Tractor mounted scarifier

Three independently floating heads that follow contours without scalping. All three are hydraulically driven with a choice of 1mm or 2mm tungsten blades without the use of belts. Optional oil cooler, tool free depth adjustment and a 2m working width.

30hp minimum tractor requirement

RYETEC P1600

Tractor mounted cut and collect

A workhorse able to cut and collect lots of debris from long rough to thick growth. Fully/semi mounted or trailed models. 1.6m working width. Heavy duty paddle flails with optional scarifier blades. High tip option is also available.

HIRE ME

50hp minimum tractor requirement

Redexim Turf Tidy 3000

Tow behind cut and collect

The Redexim Turf Tidy is an extremely versatile machine. The floating head is key to the following of the contours. The Turf Tidy is able to cut and collect long rough, as well as collect leaves, scarify and collect fairways and semi rough in one single pass. With a 1.8m working width and a high tip function as standard plus a 3m³ collection box makes the Redexim Turf Tidy an extremely useful addition to any business.

45hp minimum tractor requirement

TRILO S3 & S4

Tow behind cut and collect

These are leaders in debris collection. Basically a vacuum sweeper for golf courses. Great for leaves, but also scarification debris that is left on the surface after being pulled out.

S3 have 3m³ (40hp minimum tractor requirement) hopper and the S4 has a 4m³ (50hp minimum tractor requirement). Wander hose as standard for both machines. Brush, flail and scarification heads available.

HIRE ME

Top Dressers

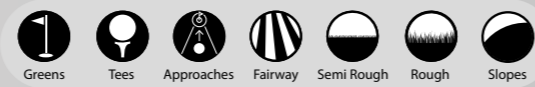

Redexim Rink SP950

Pedestrian drop top dresser

Powered by a 6.5hp this Redexim Rink SP950 brush top dresser is self propelled and very well balanced with the machines weight spread over 6 wheels. With a working width of 1m and a hopper capacity of 3m³. Able to spread sand or rootzone between 3mm and 10mm makes this machine very accurate and manoeuvrable on any surface.

Top Dressers

Redexim Rink 1205

Vehicle mounted drop top dresser

Mounted brush top dresser for Cushman Trucksters, Toro Workmans and John Deere ProGator. Working width of 1.8m, Hopper capacity of 1m³. Max working speed of 18mph. Spread thickness of 3 - 10mm. Storage stands available easy take on and off.

Redexim Rink DS 800

Vehicle mounted spinner top dresser

Mounted twin spinner top dresser for Cushman Trucksters, Toro Workmans and John Deere ProGator. Up to 12m working spreader width. Hopper capacity 800 litres. Spreading thickness 0.5mm to 15mm. Hydraulic rear door prevents spillage.

Redexim Rink DS 1200

Tow behind spinner top dresser

Trailed twin spinner top dresser. Spreading width up to 12m. Hydraulically controlled belts and spinner speed for accurate applications and quick set up. Four wheels on pivoting axles and optional electronic control panel. Hopper capacity 1.2m³ with 25 l/m hydraulic flow.

25hp minimum tractor requirement

Redexim Rink DS 3100

Tow behind spinner top dresser

Spreading width up to 12m. Hydraulically controlled belts and spinner speed for accurate applications and quick set up. Four wheels on pivoting axles for stability and minimal ground disruption. Hopper capacity 3.1m³ with 25 l/m hydraulic flow.

50hp minimum tractor requirement

HIRE ME

Overseeders

Redexim 1575 Overseeder

Disc seeder

A new seed delivery mechanism with single point adjustment makes this easy to adjust without the need for tools. The tough discs cut grooves in the soil to be accurately placed before the roller closes the grooves. Fantastic germination rates. 1.6m working width, working depth up to 20mm and 75mm disc spacing.

HIRE ME

40hp minimum tractor requirement

Redexim Speedseed 1500

Dimple seeder

1.5m working width with individual conical holes produced at a speed up to 8mph. Working depths from 5 - 20mm, hopper capacity 224l, 990 holes per m², and ground driven with no PTO shafts.

HIRE ME

30hp minimum tractor requirement

Renovation

GROUNDSMAN Turf Cutter

Pedestrian turf cutter

With the lowest HAVs on the market and with working widths of 12" to 24". The lighter TM26" is perfect for hard to get places or when lots of turning is required. The bigger TM46 is more productive. Both have various blade sizes and options such as mole ploughs and cable layers.

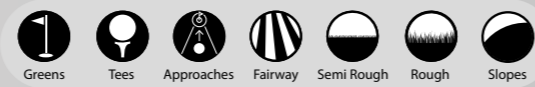

Redexim Core Collector 1200

Pedestrian core collector

A self propelled pedestrian machine which collects cores and scarification debris. It then hydraulically lifts to a height that can tip into a trailer or utility vehicle. It has a working width of 1.2m and a 300 litre hopper.

HIRE ME

BARONESS FS900
Quality on Demand

HIRE ME

Ride on core collector

A ride-on core and debris collector which is revolutionising how renovations are conducted on golf courses and other fine turf areas. The Baroness FS900 is extremely manoeuvrable and compact. This machine can pick up cores, scarification debris or even both at the same time. The counter rotating pick up brush also collects well over 95% of the debris in one pass into a high tip hopper for easy and straight forward disposal.

Redexim Cultipack Seeder 910

HIRE ME

Pedestrian cultivator

The Redexim Cultipack seeder is ideal for the seeding of smaller or more sensitive areas. It is a stand-on chariot towed by a two wheel tractor unit providing excellent speed and manoeuvrability. The tractor creates furrows for the seeds before the machine accurately distributes them. With a working width of 90cm and powered by Honda engine it is more than capable of many applications

Redexim Multivator 1800

Tractor mounted soil recycler aerator

The Redexim Multivator is fantastic for turf renovation as it decompacts and top dresses at the same time with the material it pulls out. It recycles material already on the site saving time and money importing materials. The nine highly durable carbide blades can work up to 14cm deep and work at a width of 1.8m.

100hp minimum tractor requirement

Redexim Vibra Sandmaster 1600

Tow behind sand slitter injector

This machine effectively decompacts the surface down to approximately 25cm by using counter rotating blades creating 25mm (1") slits. There are 6 slits per pass at 26cm spacings (10") which are then filled with sand. This sand is fed from a hopper via a belt which is then vibrated down the slits so even damp sand can be used.

Leaf & Debris Clearance

TRILO B7 & BL960

Blowers

These blowers are tractor mounted via the three point link and require 35hp and 50hp respectively. Both blowers are bi-directional and are operated hydraulically from the tractor on the spool valves. The blowers boast the most air flow for their class.

SCAG Windstorm Blower

Ride on blower

This is a ride on blower powered by a 37hp fuel injected petrol engine. The compact stand on design makes manoeuvring in tight spaces a cinch while it's operator can use the multi directional air flow output nozzle simultaneously. A real game changer if you have leaf and debris issues.

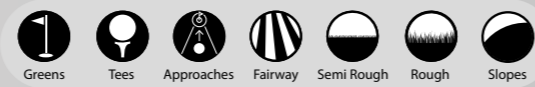

BARONESS AgriMetal TB270

Tow behind petrol blower

Powered by a market leading 27hp engine, this thunderous turbine has the most power in the business. Using a wireless remote control the AgriMetal TB270 blower can easily swivel for maximum control in tight areas and for dislodging stubborn leaves. The oversized muffler significantly reduces noise levels. This is great for wetter areas as it comparatively lighter and kinder to the turf.

Leaf & Debris Clearance

TRILO S3 & S4

Tow behind cut and collect

These are leaders in debris collection. Basically a vacuum sweeper for golf courses. Great for leaves, but also scarification debris that is left on the surface after being pulled out.

S3 have 3m³ (40hp minimum tractor requirement) hopper and the S4 has a 4m³ (50hp minimum tractor requirement). Wander hose as standard for both machines. Brush, flail and scarification heads available.

Redexim Turf Tidy 3000

Tow behind debris collector

Extremely versatile machine. The floating head is key to following contours. Able to cut and collect long rough, collect leaves, scarify and collect fairways and semi rough in one pass. 1.8 working width. High Tip function as standard. 3cm³ collection box. 45hp tractor requirement. This machine can be fitted with a flail head or rotating brush.

sisis Litamisa 1800

Tow behind debris collector

A tractor mounted sweeper and collector for collecting a wide range of surface debris from large areas. This sweeper has a working width of 1.8m and can pick up debris from scarification as well as leaves, pine needles. The spiral brush design is better for dislodging stubborn debris and the high hydraulic tip facility with a galvanised hopper makes it for great for tipping into trailers.

Sprayers

TEAM Sprayers Cub

Pedestrian sprayer

The smallest Team Sprayer available in 2m or 3m booms. Standard with pressure regulator and easy on off pump switch makes this perfect for spot spraying area such as single greens. There is an agitation switch that can be flipped between spraying or agitation to keep soluble suspended. 30 litre removable tank (for pre-mixing with a 8LPM diaphragm pump and interchangeable batteries for extended use.

TEAM Sprayers Club

Tractor mounted sprayer

A tractor mounted balanced manually operated control valves to operate all spray and pressure functions. Includes booms from 6m-12m. 20 litre chemical inductor tank

Diaphragm pump: High quality poly' diaphragm pump withstands any aggressive plant protection chemicals, clothes storage for all PPE equipment. 15 litre tank for hand washing

'Break back' boom design is a standard feature on all models to avoid damage from unseen obstructions.

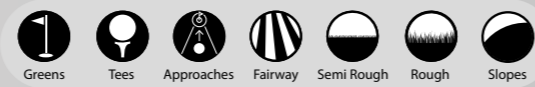

TEAM Sprayers Pro Demount

Tractor mounted sprayer

This British made sprayer sits perfectly on a Toro Workman, John Deere ProGator or Cushman Truckster. Fully in cab electric spray controls to operate all spray and pressure functions with individual boom control. Boom with choices from 6m to 12m with electric folding option. Clothes storage for all PPE equipment. 'Break back' boom design is a standard feature on all models to avoid damage from unseen obstructions. GPS and individual nozzle switch off available for improved accuracy and cost savings.

TIMBERWOLF TW PTO 150H

Tractor mounted PTO chipper

A tractor mounted PTO chipper with self-contained hydraulic system delivering a superb chipping performance and will fit onto any tractors fitted with a 6-spline 540rpm PTO shaft, Category 1 linkage and a 12 volt 7 pin lighting socket from 25 – 60hp. This wood chipper will easily tackle branches up to 152mm (6") depending on tractor horsepower. The sleek design of the TW PTO/150H is a perfect match to sit behind a compact tractor and short enough to manoeuvre with ease.

TIMBERWOLF TW 230 HB

HIRE ME

Road-tow chipper

This a class leading British made road towable chipper is under 750kg. It has a powerful 37hp petrol engine for the environmental conscious chipping up to 6" capacity of wood. Reliable solid features include hydraulic feed rollers, auto-stress control, braked road chassis and single point greasing stations for improve serviceability.

TIMBERWOLF TW 280 FTR

Tracked chipper

This is a tracked chipper with an incredible off-road capability. For even more challenging areas there is a variable tracked option. It is powered by a 57hp Kubota petrol engine which is E10 compliant making it one of the most powerful and environmentally credible chippers available to the market in its class. Dual Speed tracking for getting to areas quicker and the then switching down into a more controlled speed for more challenging topography. This low centre of gravity machine has a chipping ability of up to 8 inches.

BOMFORD TURNER Kestrel 5.7P

HIRE ME

Power arm flail

Bomfords power arms are built in the UK and the models can fit tractors from 15hp to 160hp with varying reaches suiting all types of tractors. The Kestrel S 5.7P Power Plus has a 5.7m reach with a parallel arm as standard. It requires a tractor with a minimum 60hp. There are also steel hose covers, choice of flails, heads and cutter bars. Fantastic for hedge and ditch work.

Stella engineered URS 100

Remote control slope mower

The Stella URS 100 works on extreme slopes up to 55°. The operator is always safe, away from emissions and dangers. The balanced weight distribution, the wide track of the crawler chassis and the low centre of gravity ensure soil-friendly and safe off-road use. The patented caterpillar drive with the ingenious guide rollers ensures traction on all types of soil. It is powered by the high-quality Honda iGXV 800 EFI engine with 26hp and 55 Nm of torque. This is the most robust rotary remote controlled mower on the market for heavy growth.

Kubota KX030-4

Excavator

Kubota are the world leaders in 360 excavators and produce them from 1 - 9 tonne. There are many specifications such as weight, widths and reach to cope with all the demands on a golf course. The KX030 is our most popular for golf courses. With a 25hp Kubota diesel engine and 3 tonne weight this suits the majority of jobs. Their digging depth is 3.5m and transport width is 1.5m giving great productivity for bunker renovations and drainage work whilst access should not be an issue.

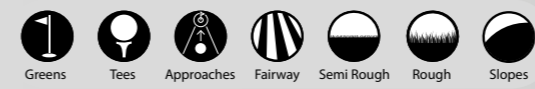

MERLO Handlers

Telehandlers

Merlo is a family run business based in Italy since 1964. They have a fantastic range of telehandlers for all aspects of lifting work.

Ranging from 75hp and 6m booms up to 156hp and a lifting capacity of 4 tonnes.

Also available in fully electric versions for environmentally sensitive areas or working inside.

RIPAGREEN Thermal Weed Control

Thermal weed control

The new generation of professional thermic hot air blowers has been invented by RIPAGREEN®. Its process forces high velocity hot air over the leaf of a plant. This hot air instantly causes a thermal shock that breaks the chlorophyll producing part of the plant, the process of photosynthesis is prevented. The plant then dries naturally with a visible result after a few hours.

Kersten Weedo II

For moss & weed removal

An entry level option but still an extremely capable machine. The Weedo II is a dedicated weedbrush for pathways and carparks around the golf course. The weedbrush allows clearance of both moss and more stubborn weeds from hard surfaces such as tarmac or block paving.

Simple one lever operation and the folding handlebars gives it a compact design means it is easily transported from site to site. The weedbrush can be set to the right or the left hand side of the machine for clearing long paths in either direction.

Kersten UBS

Multi-attachment machine

The pinnacle for path clearance machines. Hydraulically driven to both wheels ensures maximum control and comfort for the operator. Working head attachments can be changed in seconds with its quick release facility as standard. There are various attachments such as weed ripper head, rotating sweeper, rotary cutting deck, flail and snow clearance.

Simple one lever operation and the folding handlebars gives it a compact design means it is easily transported from site to site. The weedbrush can be set to the right or the left hand side of the machine for clearing long paths in either direction.

BRIAN JAMES TRAILERS

Road legal commercial trailer

Brian James make trailers from single axle up to triple axle. From 2.7m to 6m long with varying chassis for plant, tipping, car transporting, general duty and much more.

BJT make a general duty trailer perfect for transporting a pedestrian aerator around the golf course or larger trailers for transporting machinery including excavators from site to site.

Kubota

Heavy duty landscape trailers

Kubota's make trailers from 0.5 tonne to 3.5 tonne. The trailers come with options such as hydraulic tip, mesh sides, parking brakes, heavy duty suspension. There are also removable hinged sides and corner posts and have turf tyres as standard.
