## Lister Wilder are now Official Suppliers of Avant

The smallest loaders in the Avant range, the 200 Series start at just 960mm wide with 360° visibility and suitable for working where access is narrow or limited. The biggest 4WD loader is the 800 Series, capable of tackling the heavy duty tasks where a conventional loader or compact tractor would struggle.

HAMM rollers are easy to operate and ergonomically optimised, because HAMM has considered design to be a crucial element in product development since the 1980s. As a result, HAMM has, to date, won close to 40 international design and innovation awards, making it the front runner in the construction industry.
