

Course information

Level 3, City & Guilds, Extended Diploma in Land-based Technology – Groundcare

Equivalent to 3 A levels, course modules are varied including a wide range of information from Health and Safety, the repair of a range of groundcare machinery, workshop practices, engines, electronic, hydraulic and transmission systems. The course is delivered both theory and practically in our industry standard workshops.

Course length

48 months - with approximately 36 weeks in college on a block release system.

The first 3 years will be delivered at Coleg Cambria Llysfasi near Ruthin, North Wales. Following this course continual technical training will be delivered at Kubota's training centre. The final award will lead to the full Kubota Diploma in land-based technology.

Entry requirements

Level 2 Diploma in Agricultural Engineering at High Merit/Distinction.

OR

5 GCSE's at grade 4 or C's in English and Maths + 3 other. Students with grade D in English and / or Maths would be considered depending on grade profiles, practical experience and the successful completion of a level 2 test in English and Maths.

Qualifications gained

You will receive a range of qualifications as part of your learning programme. These include:

- Level 3, City & Guilds, extended diploma in land-based technology- Groundcare
- Essential skills in Numeracy, Literacy and IT
- Additional non / legislative qualifications ie. telescopic handler, abrasive wheels and welding etc

Next steps

During your apprenticeship you will be eligible for LTA1 membership. On completion of the Level 3 apprenticeship, and some additional Kubota training, you will be able to progress through the tiers to eventually attain LTA4 Master Technician accreditation.

A Kubota Apprenticeship Scheme is a partnership between Kubota and Coleg Cambria Llysfasi. This industry approved training content is designed to allow young groundcare engineers to progress into positions within Kubota dealerships across the UK.

For Earth, For Life
Kubota

What are the key benefits?

- ✓ Run by Kubota trained instructors and lecturers
- ✓ Monitors your progress at work and at college to uphold and exceed all required national standards
- ✓ Gives apprentices additional soft skills to help in the workplace
- ✓ Works with a range of industry and awarding bodies to ensure that the content is relevant to the industry
- ✓ Includes manufacturer technical training delivered by Kubota
- ✓ Up to date machinery, to ensure apprentices are working on the latest technology

Why should I apply?

A Kubota apprenticeship is an opportunity to be part of the future of groundcare engineering and “earn while you learn”.

By successfully completing a Kubota apprenticeship, you will achieve an industry approved qualification at the same time as gaining fantastic hands-on practical skills through a manufacturer backed scheme and earning a wage.

Kubota Group is a global manufacturing company, specialising in agriculture, groundcare, water, and living environment products.

Employing more than 43,000 people Kubota has a worldwide network in more than 110 countries.

“For Earth, For Life”

The Kubota Group promises to continue supporting the prosperous life of humans while protecting the environment of this beautiful earth.

How do I apply?

Please discuss with your local Kubota dealer or contact one of the team below to get more information and register on the Kubota Apprenticeship Scheme.
