Company Information

Lister Wilder are a family business that have been supplying the highest quality farm, groundcare and estate machinery for over 75 years. One reason for our steady growth has been the commitment of our staff and the strength of our products. Whilst the majority of our customers have been professional users, we are finding that more and more people are looking for good quality groundcare machinery that can be fully supported, as well as being competitively priced.

Five Showrooms Across the South

Most branches have a large, extensive showroom where both trade customers and the general public are all welcome. Here you will find all manner of tools attachments and hand held machinery, all of which have been chosen to meet the demands of professional users.

Mobile Service Engineers

We believe this is where you can sort the wheat from the chaff, and with over 60 mobile service engineers, we take after sales support very seriously. Our engineers are some of the most experienced in the country and their specialist training will save you both time and money.

Work can be carried out on site or in our workshops, but whichever you choose, we are so confident in our engineers' ability that all Kubota repairs come with a full 18 month warranty.

Try Before You Buy

For over 75 years we have been offering on-site demonstrations to make sure that your machine does exactly what you expect of it.

Following a detailed conversation or with a more complicated scenario during a site visit we will recommend the best machine for the job. This is based on a number of factors, such as the size of the area, the desired finish, the mixture of lawn, paddock, orchard, slopes and your budget.

The next stage is to arrange an on-site demonstration. Brochures and showrooms can provide useful guidance, but you need to know what sort of finish the machine will leave, how it will cope with your slopes, how manoeuvrable it is, how much noise it makes etc.

Time and again we see people who have been mis-sold machinery with incorrect claims about what the machine is capable of. Our demonstration service eliminates this and is provided absolutely free of charge and without obligation.

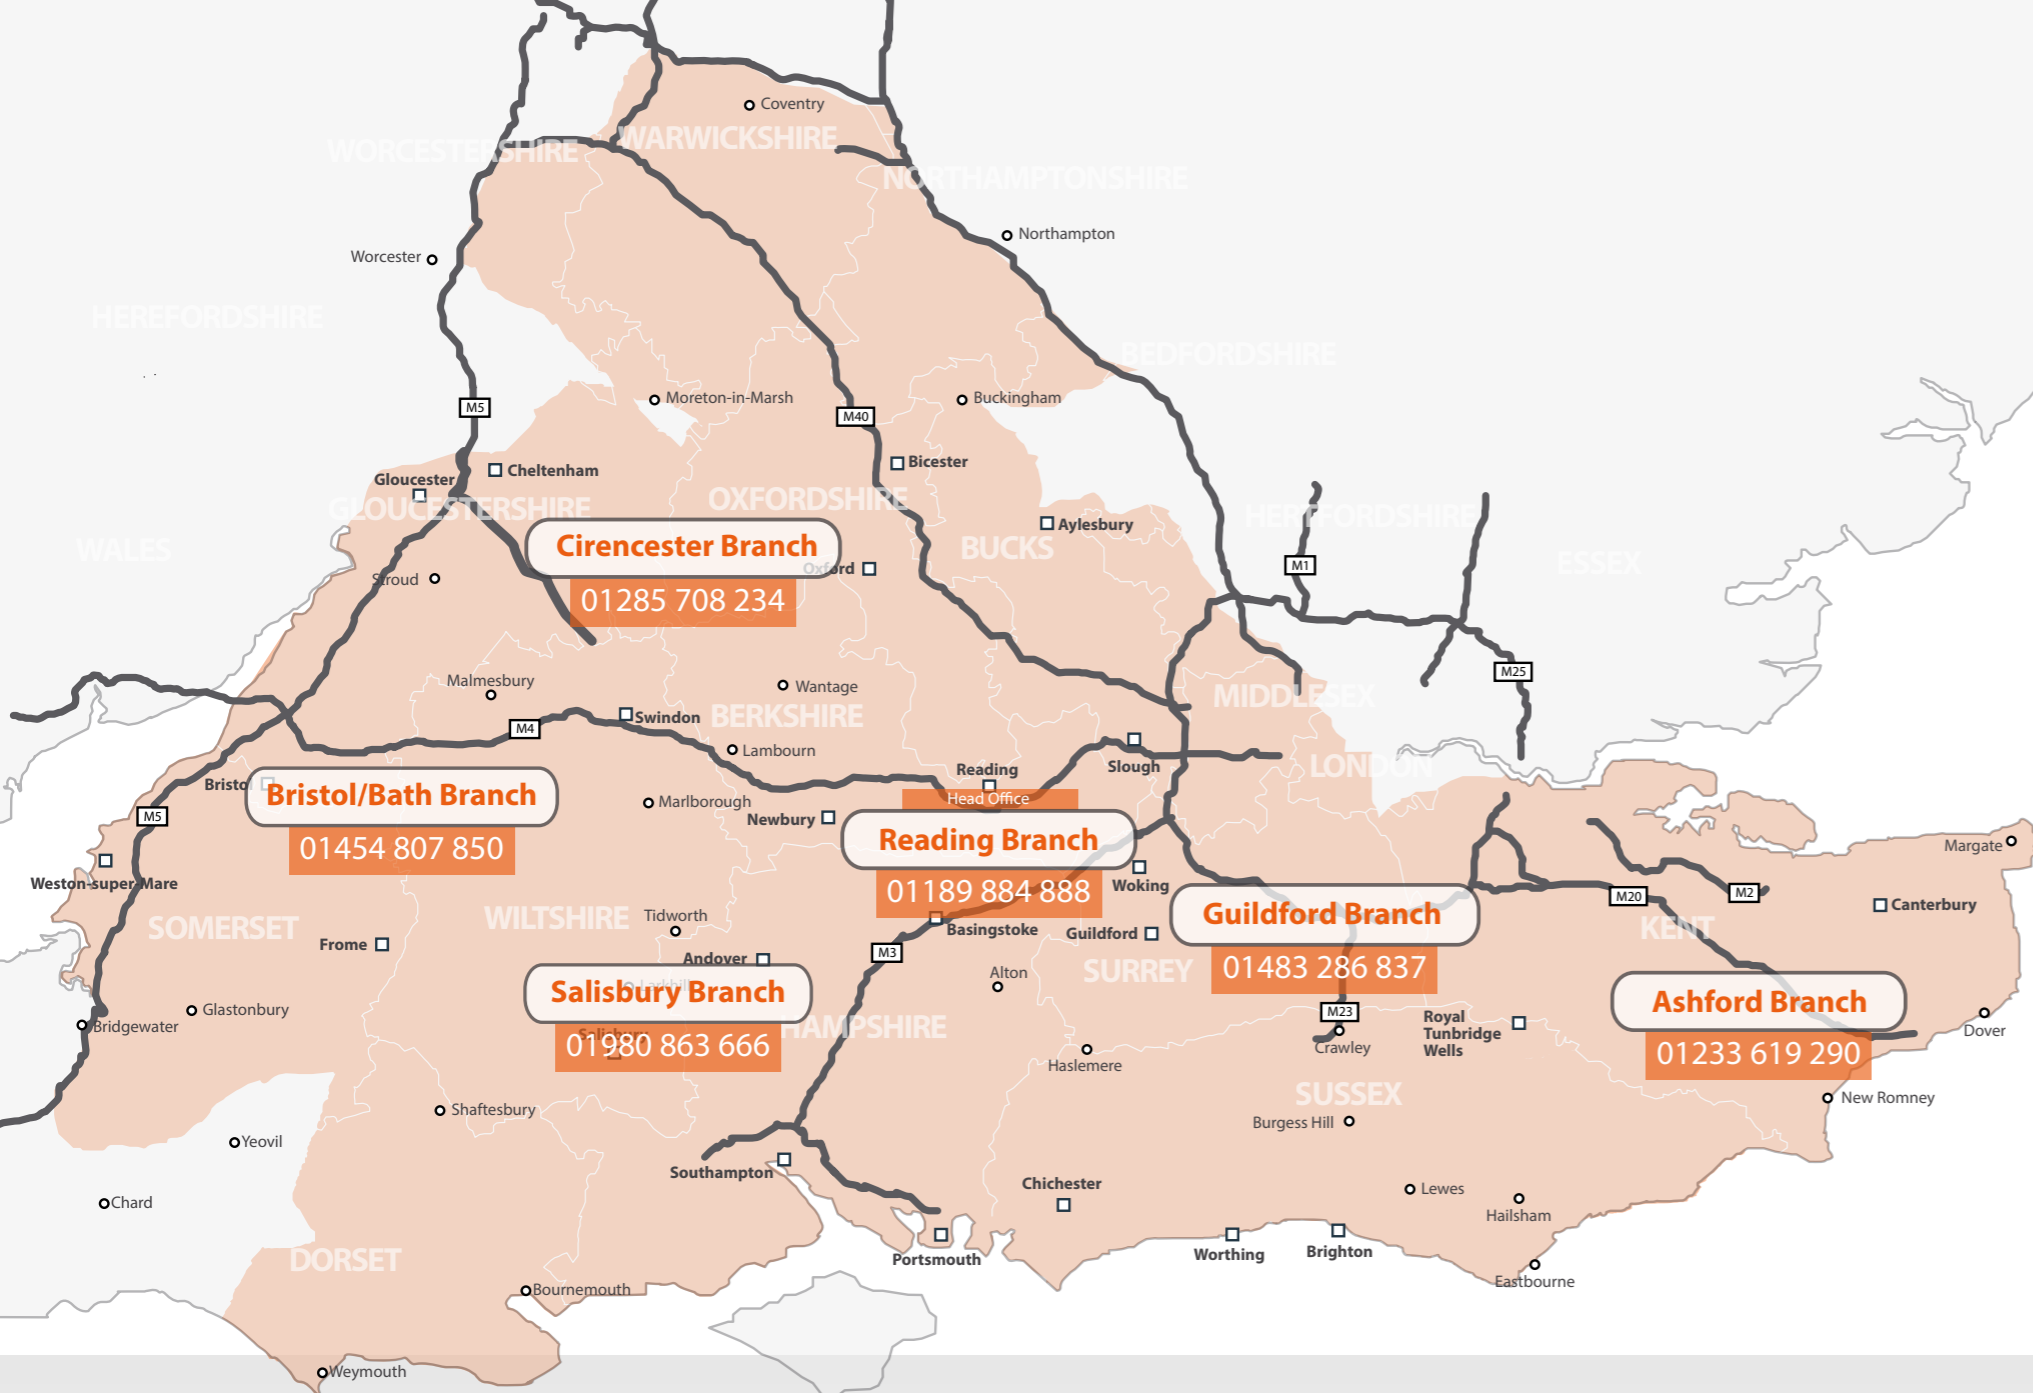

Best Brands and Product Ranges

Ask any professional groundsman and they will know names such as Kubota, Timberwolf, Sisis, Dennis, Trimax and Stihl. These represent benchmarks for the best machinery and products in our buyer's guide to show what is on offer for the serious gardener and estate manager.

Our Locations

We're not looking to conquer the world, we just believe that you want good, local support and that requires depots in key locations. We believe that no-one offers you better coverage across Central Southern England, so it doesn't matter if you want a bearing in Berkshire, wheel nut in Wiltshire, or a starter motor in Surrey, we are here to make sure your machines keep working as hard as you do.

Our History

We are a very straightforward company who specialise in supplying and maintaining machinery for four key markets; Agriculture, Groundcare, Construction and Arboriculture.

Established in 1947, we remain a wholly owned family business, and this has certainly

been a factor in attracting and retaining the very best sales, parts and service staff in the industry. It's their knowledge and expertise that allow us to make the leap from being 'just another machinery dealer' into one of the most focused, customer friendly, and exciting Dealerships in the South of England.

1947	1982	1987	1995	2000	2001	2002	2004	2008	2009	2012	2013	2015	2017	2020	2022	2023
Tractors & Farm Aids (TFA) is founded by George Scott selling and supporting the Massey Ferguson range from its base in Reading. At the time there was only one MF dealership smaller than ourselves	Walter Wilder, based in Wallingford, relinquishes MF for Oxfordshire. This was our first opportunity to grow under the ownership of Scott & King who purchase the premises and take on Walter Wilder.	Lister Farm Sales, MF dealers for Gloucestershire, come to an agreement where the companies continue to operate as TFA, Walter Wilder and Lister Farm Sales under the same family ownership.	Our Groundcare division is formed and soon after the Kubota franchise is added - this immediately accelerates our growth and Reading becomes the new hub for this business	A decision is taken to combine the strength of the 'Lister' name in the West with the reputation of 'Wilder' in the East, and so TFA is renamed to Lister Wilder.	With Agriculture and Groundcare now thriving, the decision is made to add Construction machinery. The Kubota range is soon added and we now sell around 700 units a year.	The Arboriculture division is formed and is built around Timberwolf, Stihl and Husqvarna franchises. This team deal with tree surgeons and contractors to supply and support this specialist kit.	With London and Surrey being such a heavily populated area, a decision is taken to open a new branch in Ockham, near Guildford. It acts as a great hub for our team to serve the surrounding area.	A service centre is opened on the outskirts of Bristol that grows steadily to become a fully-fledged branch.	Our Ashford branch opens its doors, initially focusing on our Groundcare machinery range before expanding and becoming an official Kubota construction centre as well.	We are awarded the prestigious Gold Service Award from Kubota along with the Service Dealer - Groundcare Dealer of the Year.	Our new branch at Ufton, Southam near Royal Leamington Spa in Warwickshire, opens for business.	With Kubota already a World leader in the sub 100hp tractor range market, their desire to move into the Agricultural market is seen as a natural move by everyone throughout the industry.	The business in Kent outgrows its site and with the addition of Kubota Agriculture, a new branch is opened for business and becomes the first fully-fledged Kubota Centre in the country.	It becomes clear that it would be impossible to represent both Kubota and AGCO brands in the long term. As a result, Lister Wilder chose to uncouple from the AGCO franchise in a way that protected everyone involved - this left a clear pathway whereby we could focus on a full line offering for our Agricultural, Groundcare and Construction customers - three pillars of the business that form the bedrock of what we do.	With a fresh clarity and purpose, the 'New' Lister Wilder gets off to a flying start with two new Kubota Centres opening up - one in Keynsham (exactly halfway between Bristol & Bath) and the other at Bibury, just on the outskirts of Cirencester.	In June, our Kubota Construction business continued to expand as we joined forces with Harper Plant. Operating from the existing site at Salisbury, the whole Harper team became part of the Lister Wilder family - serving and supporting customers across Hampshire, Dorset & Wiltshire.

Lawncare Calendar

Tips to help you maintain your lawn throughout the year

JANUARY

There is very little work to do this month apart from brushing away leaves.

Keep off the grass if frozen or waterlogged.

Log splitting and salt spreading are the only jobs really required at this time of year.

FEBRUARY

Rake the grass thoroughly. Spike the lawn to aerate and stimulate soil organisms and root growth and apply lawn sand if necessary.

MARCH

The yearly lawn work programme really starts this month. As soon as the ground conditions are suitable, the first cut can be made. This should merely 'top' the grass as close cutting at this stage could result in severe yellowing/browning. Two cuts are generally sufficient this month.

APRIL

Mow often enough to stop grass growing away. Dig out patches of coarse grass or resistant weed. Re-seed bare patches.

MAY

Keep mowing increasing the frequency as required. Treat with selective weed killers or combined weed/feed preparations if you did not feed the lawn in April.

JUNE

Summer mowing should now be under way. It should be necessary to mow the lawn twice a week. Raking before mowing is important this month as the combined action keeps runners of clover under control. Water the grass if necessary, and remember to soak thoroughly.

JULY

Treat the grass with the second application of fertiliser or weed killer/fertiliser. Water when necessary and rake occasionally. As a general rule the grass clippings should be removed each time you mow. If weather conditions are dry and hot and the grass is weed free, leave the clippings on the lawn to help maintain ground moisture.

AUGUST

Keep mowing regularly and watering as necessary. Fill any cracks caused by drought with a mixture of sharp sand and soil. In dry weather conditions leave the grass longer to help retain ground moisture.

SEPTEMBER

Raise the height of cut to allow the grass to thicken and protect the roots from the winter frost and snow.

OCTOBER

Rake out the thatch from the turf and spike the lawn to assist in drainage. Brush in sharp sand.

NOVEMBER

Use a stiff broom to disperse worm casts before mowing. Keep turf free from leaves.

DECEMBER

Apart from brushing away leaves, December is a slack end of a busy year. Keep off the lawn if it is very wet or frozen.

Ride On Mowers

Book your demo today

Sales · Parts · Service

Engine and drive.

Choose a high powered engine where cuts are infrequent and the grass is left to grow long and dense. Diesel engines give the ultimate in performance, low running costs and longer life expectancy. Four wheel drive can help mowing on slopes and in wetter conditions, although some would say if it's that wet, you shouldn't be mowing anyway!

Site.

Choose the machine to suit the scale of your operation. Select a cutting width appropriate to the size of the site. Check the width of the site access, topographical features and on-site obstacles.

The Comfort Factor.

If long hours of mowing are anticipated, choose a mower with a comfortable operators platform, adjustable seat and well-grouped controls.

Residual Values.

Kubota hold the best second-hand values. This will give you peace of mind that your investment will hold its value and offer you the best return when you come to sell or part exchange it.

Grass Collection.

Ride-on mowers with grass collectors are available for those occasions where the finish demands the grass to be cut and collected. The 'direct collect' and 'brush' collectors provide the most effective collection systems in a wider variety of conditions, whilst collectors that use a tube from the side of the deck are more prone to blocking, particularly where the grass is long or damp. If there is a specific need to empty into a trailer or large compost heap, then please ask about the range of high tip collectors. Mulching mowers are suitable where collection is not necessary and where there is some value from sending tiny clippings back onto the sward.

Height of cut.

Make sure the cutting height is suitable for your needs. Adjustment for the height of cut should be quick and easy for sites where a variety of mowing heights are needed throughout the season.

Compact Tractors

Power.

Think about what the tractor is needed for and make sure there is sufficient power for the operations, implements and site conditions.

Dimensions.

Assess the work site for limitations and match tractor dimensions and manoeuvrability accordingly.

Residual Values.

Kubota hold the best second-hand values available! This will give you peace of mind that your investment will hold its value and offer you the best return when you come to sell or part exchange it.

Cab and rollbar.

Rollbar tractors are the most cost effective and popular. Cabbed tractors with heaters and air conditioning are useful if there is a lot of work to undertake in winter and summer months. Cabs are also handy for spraying or hedgecutting or dusty work such as soil cultivation or mowing in the summer.

Comfort.

Comfort features are ideal for long hours of work. Isolated platforms and suspension seats help reduce body vibration.

Transmission.

Hydrostatic transmissions are ideal for loader and mowing where the operator is constantly moving from forward to reverse and back again. Certain implements, including some aeration equipment, will require the use of creep gears. Top speed becomes important where travel on the road is anticipated.

Options.

Don't forget to specify the most appropriate type of tyres, and consider other options such as work lights, beacons, extra spool valves and weights.

Did you know? Kubota are the Worlds No.1 manufacturer of diesel compact tractors

Kubota B2 Series

With almost 30 makes of tractor on the market, the choice can seem daunting. Our advice is to stick to names that are known and trusted within the industry. This way you can be sure of good aftersales service, the quality of the engineering and perhaps most importantly the re-sale value of the product. **Kubota** is the most respected name in compact tractors and is the preferred choice for thousands of professional users worldwide.

ATVs & Utility Vehicles

Sales • Parts • Service

Type.

The type of terrain and work will determine whether a quad bike or utility vehicle is most suitable. Choose a quad bike for speed, and select high powered, four wheel-drive machines for hilly sites and boggy ground. The Kubota RTV Utility vehicles offer versatility, high load capacity and the ability to carry a passenger.

Environment.

Issues such as emissions and noise will take on different levels of importance depending on your site, public access and the detail of the work being undertaken. Electric vehicles are available for noise-sensitive areas and you'll also need to take into account either charging points or an appropriate fuel source.

Kubota RTV X1110

Versatility.

A wide variety of trailed equipment such as mowers, spreaders and sprayers will further extend the use of the vehicle. Some examples are shown on pages 12-15.

Carrying/towing capacity.

Quad bikes have front and rear carriers suited to transporting small loads, whilst the Kubota utility vehicle is capable of carrying large volumes of loose materials and tools.

Options.

A range of options are available for utility vehicles, including all-weather cabs, leaf cages, hydraulic tipping boxes and tool holders. Consider whether any of these would be useful now or in the future and also ask about the most suitable type of tyre.

Trimax Roller Mowers

Up To 50HR PTO Grease.

With the use of our new FLEX CONE, we can prevent dust and external agents getting trapped in the bearings, also minimising the risk of PTO's coming in contact with the rotating parts of the drives. This greatly reduces the amount of greasing required, extending intervals up to 50 hour PTO greasing intervals.

LazerBladez™.

Snake is fitted with LazerBladez™, a unique blade system with a carefully engineered centre of gravity and distinctive tilt-forward blade design. Utilising the LazerBladez™ full length cutting edge, Snake produces a clean finish even when mowing at high ground speeds. LazerBladez™ are made with high grade alloy steel providing a significant increase in blade and bolt life for added safety and lower operating costs.

Trimax Snake 320

3 Year Warranty.

We aim to build mowers that last and we back this up by a 3 year warranty. Our robust design coupled with our experienced service and support network ensure minimum downtime and more productivity.

Kerb Jump.

"Kerb Jump" enables all three mower decks to be raised just off the ground without disengaging the PTO. This improves productivity by allowing the mower to traverse gravel driveways or paths and quickly turn at headlands.

Full Width Rollers.

Full width rollers minimises scalping in extreme undulating conditions and allows mowing over kerbsides, bunkers and potholes without blade strike.

Chippers

Sales · Parts · Service

Infeed.

The anticipated dimensions of the timber will determine the most appropriate class of machine. They can range in size from 3" up to a massive 12" diameter capacity.

The feed itself is either via a gravity fed system or hydraulic rollers on the larger machines.

TIMBERWOLF – THE UK'S BEST SELLING WOOD CHIPPER

Discharge chute.

The smaller estate machines tend to discharge the chippings onto the ground, while the larger chippers have a discharge chute that fires the chips into trailers or skips.

Power.

Driven by either a petrol engine, diesel engine or powered by a compact tractor, the power is matched to the maximum capacity of the machine.

Maintenance.

A chipper is only as good as its blades, and blunt blades will seriously impede the performance of the machine. Sharpening is a relatively quick and simple operation, please see below for price options:

Maintaining Your Garden

NEW - Maestro Country

The ideal shredder for those needing more power and bigger dimensions. This shredder is able to handle wood up to 45mm in diameter with a large capacity collector and engine.

NEW - Maestro City

With its wide feed-in opening the Maestro City is easy to use. With this in mind, it has the added advantage that the feed-in position is 15cm lower compared to the Maestro Country.

Eliet are an innovative, family-run firm based in Belgium. They supply high quality shredders, lawn edgers and aerators to both the professional, and the domestic customer. For further information contact your local area sales manager.

Super Prof Trailed

Developed from a low-maintenance perspective. The machine shreds wood as well as large volumes of green waste and with all the controls grouped in a well-organised dashboard at the front.

Major 4S

The Major 4S is an appreciated tool by both the private garden lover and the professional. Compact and light, whilst the wide feed-in opening copes easily with thick branches with lots of twigs.

Minor 4S Shredder

The Minor 4S smoothly combines a wide hopper for various types of waste. Waste is processed safely with a dedicated safety screen, steel safety shield and a heavy-duty debris flap.

Did you know?

Lister Wilder were awarded the prestigious Gold Standard Award for service

Cutting Mechanism.

The cutting mechanism and blade type should be selected according to the type of vegetation, the frequency of cut and the desired finish.

Cylinder Mowers.

Cylinder mowers are ideal for regularly mown sites where a fine-turf finish is required the greater the number of knives on a cylinder the more precise the cut will be.

Rotary Mowers.

Rotary mowers are good all-rounders and will cope well where mowing is less frequent and the grass is left longer.

Dennis FT 510

The most popular Dennis machine the FT is an interchangeable cassette mower giving options to fit 12 different heads including scarifiers, verticutters, brushes, spikers and slitters as well as 5 or 9 blade cutter cassettes with 15 seconds changeover of cassettes. Available in 17" (43cm), 20" (51cm) and 24" (61cm) cutting widths.

Height of Cut.

Make sure the cutting height is suitable for your needs. Adjustment for the height of cut should be quick and easy

Wheels and Rollers.

For a striped effect, always choose a mower with a rear roller. On a cylinder mower, it's worth noting that the distance between the front and rear rollers can affect the mower's ability to follow undulations.

Servicing

Fixed price servicing available

Did you know?

Stihl machinery is sold in over 160 countries worldwide

Power.

Match the power rating to the type and amount of growth, and thickness of the hedge material. You must however take into account the weight of the machine in relation to the duration of use.

Fuel.

Petrol powered trimmers give the user freedom of movement and although electric versions are available from garden centres, they are not something that we would recommend.

Reach.

For extra tall or wide hedges the long reach hedge trimmers are perfect. A shorter extension is also available and this proves very handy for working on wide, low hedges.

Cutting heads.

Single sided cutting blades on handheld models are popular for safety reasons because the cutting sweep is made away from the operator. Double-sided blades are more efficient as cutting is on both the down and up strokes. For high quality finish on ornamental hedges choose a trimmer with close spacing between the teeth and a fast tip speed.

Hedge Trimmers

STIHL AND HUSQVARNA ARE WITHOUT DOUBT THE LEADERS IN CHAINSAW TECHNOLOGY AND DEVELOPMENT. AS WE ARE AUTHORISED DEALERS FOR BOTH RANGES YOU CAN HAVE TOTAL CONFIDENCE IN FINDING THE PERFECT MACHINE FOR YOUR REQUIREMENTS.

Chainsaws

The comprehensive range for wood of all sizes

Combining innovative technology, high performance, optimum ergonomics and low weight, our chainsaws create the international standards for all types of chainsaw. Through a process of continual research and development, these chainsaws have evolved into a range of specialist saws to meet every application.

The range includes petrol, cordless, arborist, rescue, electric, agriculture, landscaping chainsaws and more. No matter the task at hand we have the right chainsaw for you and your needs. In addition, we also have a large range of chainsaw accessories and tools for maintenance such as filing tools, storage cases, fuels, oils, cleaning solutions and more.

Washers

A range of cold pressure washers suitable for domestic and professional use.

STIHL have a large range of pressure washers and wet and dry vacuums, for all your jet washing and cleaning needs.

Cleaning up dirt in no time, our pressure washers boast robust technology yet a comfortable design, meaning you can jet wash your car, your patio or your garden furniture with ease.

Whether you are doing a quick clean-up at home, or you need the right machine for industrial cleaning, we have the pressure washer or wet and dry vacuum for you. In addition to our pressure washers, and wet and dry vacuums, we also have a range of accessories and cleaning agents.

Blowers

Petrol, electric or cordless, hand held or backpack

Blowers and vacuums from STIHL really prove their value in gardens and traffic areas or parks. Fallen leaves, grass cuttings, general debris - nothing can withstand their powerful blast. Everything is cleared away quickly. The STIHL vacuum shredders pick up immense volumes of fallen leaves, cut grass or trimmings. This garden waste is finely shredded at the same time so that it can be used for composting or mulching.

Choose from hand held, cordless, backpack and more to cater for any application required.

Pedestrian machines and tractor mounted versions are available for large estate management.

Grass Trimmers, Brushcutters and Clearing Saws

Performance for woodland, meadow and garden

Our garden trimmers, brushcutters and clearing saws can quickly tame long grass and undergrowth with great ease.

These can be fitted with various cutting tools and mowing lines to suit every job. No matter the task at hand we have the garden trimmer, brushcutter or clearing saw for you and your needs.

Models with 4-MIX engines produce significantly less exhaust fumes than conventional two-stroke engines, giving you increased fuel efficiency whilst reducing impact on the environment. We also have a large range of accessories for all our cutting equipment including harnesses, protective equipment and clothing.

Battery Series

Sales · Parts · Service

PERFORMANCE ELECTRONICS WITH DERATING FUNCTION.

This function protects your chainsaw against possible overheating by reducing the current. Additionally, it notifies you by means of a reduction in power if you only have very little battery power remaining.

INTUITIVE CONTROLS.

Three speed settings limit the chain speed to 20, 24 or 30 m/s, so you can maximise battery life when completing less intensive tasks such as snedding or brushing.

MSA 300 CORDLESS CHAINSAW

SOFT GRIP CONTROL HANDLE.

Thanks to the soft grip on the control handle, the MSA 300 sits comfortably in the hand and can be operated safely.

FLEECE FILTER.

The fleece filter guarantees consistent performance. The finepored filter material keeps even very fine dust and dirt away from the power electronics and electric motor.

TWO-HANDLED OPERATION.

The ergonomically shaped handle and rear control handle with comfortable soft-grip component ensure safe working in all operating positions.

THREE OPERATING MODES.

Eco Mode: operate with reduced power for maximum battery runtime. **Felling Mode:** high torque at reduced chain speed, for even sawing. **Delimiting Mode:** gives you a very high chain speed for precise cuts.

ERGONOMIC CONTROL HANDLE.

The speed can be controlled in three stages using the ergonomic control handle, which has a built-in LED display.

ANTI-VIBRATION SYSTEM.

STIHL's effective anti-vibration system dampens the oscillations from the machine's engine which significantly reduces vibrations at the handles.

AIR FILTER WITH METAL MESH.

The easy-to-clean air filter ensures a long service life and optimum engine cooling.

FSA 200 CORDLESS BRUSHCUTTER

STIHL ELECTRIC MOTOR (EC).

An extremely energy efficient, lightweight and compact motor that runs quietly, generates very low vibrations and does not require servicing.

BATTERY SLOT IN THE POWER TOOL.

AP batteries can be inserted directly into the battery slot. This will make your work even more mobile and flexible.

STIHL CONNECTED READY.

You can use the STIHL connected App and the STIHL connected Portal to view the STIHL connected gathered data and benefit from additional functions.

Cordless Range

Whether you're a hobby gardener or a professional, STIHL offers the right cordless tool for everyone.

THERE ARE FOUR BATTERY-POWERED SYSTEMS IN THE STIHL RANGE THAT ALL BENEFIT FROM HIGH QUALITY LITHIUM-ION CELLS FOR OUTSTANDING PERFORMANCE AND LONG RUNTIMES.

Battery Series & Robotic Mowers

EPOS Station.
Transmits RTK-GNSS signals between the Automower® 550 EPOS mower and guidance satellites. The mains powered reference station is required for EPOS to function and can serve multiple EPOS units per installation.

Sales · Parts · Service

Never mow again.

The battery-driven Automower® trims your entire lawn, automatically and quietly.

Rain or shine.

Automower® will cut grass in most types of weather and is designed to handle wet conditions. This robot lawn mower can easily handle wet and rainy conditions, as well as difficult terrain, including slopes, holes and even temporary obstacles like pinecones and fruits.

EPOS Mower.

Professional robotic mower featuring Husqvarna EPOS guidance with precision area management and transport paths. With virtual boundaries you can define several work areas with different settings as well as set temporary stay-out zones. Requires EPOS reference station.

550 EPOS

High or low, night or day, rain or shine.

A random travelling pattern lets the Automower® find every corner of your garden. The Automower® is so quiet that it can work in the night without disturbing anyone. On all models the mower app will let you control its working hours.

Healthier grass with a robot mower.

Husqvarna Automower® constantly cuts the grass as it grows. This is by far the gentlest way to cut grass. As a result the clippings from Husqvarna Automower® are only a few millimetres long. They will fall to the soil, mulch and fertilise your lawn, making it the ideal automatic lawn mower for your garden, no matter the size.

Theft prevention.

A pin code is required for any intervention of your robot lawn mowers. An alarm will immediately sound if the code is ignored when the mower is stopped or lifted. It is useless when stolen, as it can't be matched to other charging stations. And when reported stolen, it will be red-listed in the Husqvarna worldwide service system.

Battery Series

With Husqvarna's new range of battery-powered handheld equipment, you can do serious outdoor work without having to worry about fumes and noise.

Our Other Divisions

We have worked hard to develop three further divisions across the rest of the group and this has given us real stability and allowed us to weather the toughest of storms.

Agricultural Division

Agriculture is in our blood - we eat, sleep and breathe it! It forms the bedrock of our business and we genuinely believe that no-one cares more about getting it right than we do. Our staff understand and respect the pressures of modern day farming, and despite the long hours and sometimes intense pressure, they know that no other business can boast the wonderful characters, the magnificent history and the exciting future that Agriculture can.

Construction Division

Operating from our branches at Reading, Guildford, Ashford and Cirencester we again represent Kubota for their range of mini excavators - universally respected by hire companies and contractors for their reliability, durability and appetite for hard work.

Arboricultural Division

As main agents for Timberwolf, Stihl and Husqvarna, we have a team of specialists that sell and support chainsaws, chippers and stump grinders to tree surgeons and other professional users.

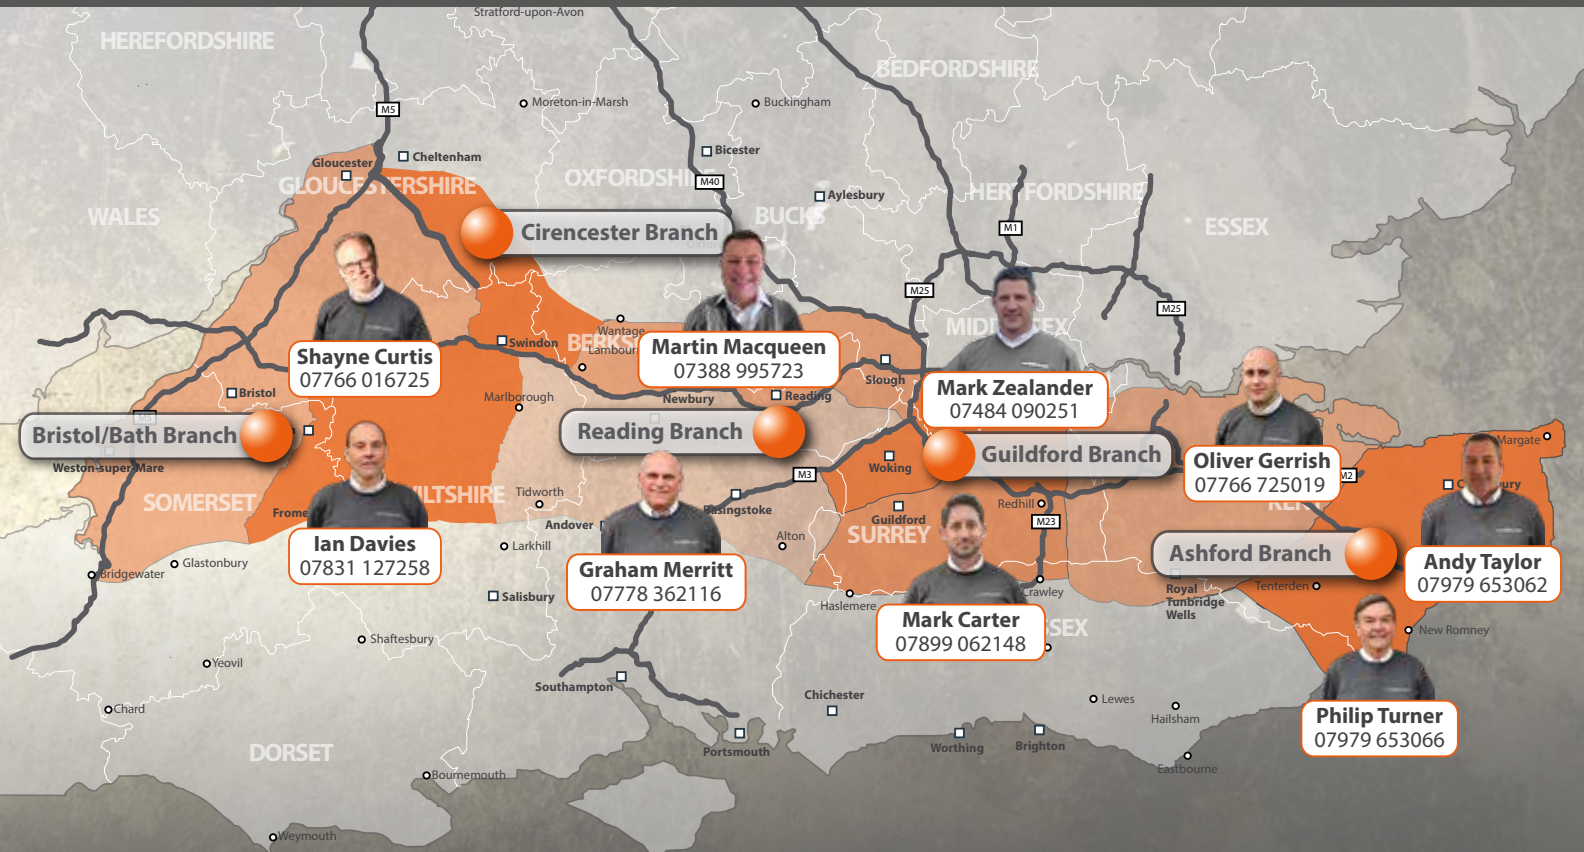

Our Other Key Franchises
