SPAREX Wi-Fi Security Camera

Product # S.168919

Monitor and secure your assets both indoors and out with the new Wi-Fi connected security camera system from Sparex.

This powerful camera has up to 18x zoom allowing you to see small details well over 100m away. Take high resolution (4MP) photos or record video in 2.7K HD at the touch of a button. In addition, enhanced infrared night vision automatically captures clear footage in low-light conditions.

Improved movement sensor technology detects and automatically tracks people in real time. You can then save recorded footage either on an internal SD card or straight to the cloud.

The Wi-Fi camera lets you immediately receive alerts to your phone or tablet via the free to download app. The app also allows you to control the camera.

Communicate with others remotely using the built-in high-powered speakers and microphone. Deter any potential intruders with an automated siren alarm. The camera uses a 2.4GHz Wi-Fi signal for better range and area coverage.

18x optical zoom for remote monitoring

(Data from Vitarcam Labs)
