- Cover for every hour you work

Lister Wilder

FINISH THE SEASON STRONG.

BOOK AN **END-OF-SEASON** SERVICE & GET YOUR KUBOTA READY FOR WHAT COMES NEXT.

Your Kubota has put in the hours. From tractors working through demanding field operations to mowers maintaining turf week after week, summer can be tough on machinery.

BOOK YOUR END-OF-SEASON SERVICE

CONTACT YOUR KUBOTA DEALER TODAY:

01189 884888

As workloads ease, it's the ideal time to give your machine some workshop attention. An **end-of-season service** can identify developing wear and take care of maintenance before it becomes downtime.

FIND IT NOW. NOT NEXT SEASON.

A worn belt, ageing hose or developing component issue might not stop you today – but left unnoticed, it could cause problems when you need your machine again. Kubota-trained technicians know what to look for and can assess the components that have worked hard throughout the season, giving you time to address anything requiring attention

READY FOR WHAT COMES NEXT.

Your Kubota dealer can also review scheduled servicing requirements and carry out any work due using Genuine Kubota Parts and approved products. Whether a tractor, mower or groundcare machine, getting it checked now means it can enter the quieter months maintained and prepared – ready for the jobs ahead.

3

THE DEGREE OF VISCOSITY. WHY IT MATTERS?

Protect your Kubota with the right oil. The right lubricant isn't just a recommendation, it's an investment in performance, protection and reliability.

Choosing the correct viscosity helps support:

/ Engine protection
/ Fuel efficiency
/ Reduced wear/longer equipment life
/ Reliable scheduled maintenance
/ Maximum uptime

WHAT DO THE NUMBERS MEAN?

Engine oils are commonly listed as multigrades, such as 5W-30 or 15W-40. The viscosity grade affects how the oil flows, making the correct choice important whether your machine is starting from cold or working hard under load. When the viscosity is right, together with the other key characteristics of the lubricant, components stay properly lubricated, helping reduce wear, support fuel economy and keep your Kubota performing as it should.

5W30
Flows easily.
Better fuel economy.
Ideal for cold starts.

5W40
Balance flow
Good or round performance
Suitable for most conditions.

10W40
Thicker flow
Better protection at high temperatures.
Ideal for older engines or heavy loads.

15W40
Maximum protection at high temperatures.
For high performance or heavy use.

20W40
Highest film strength.
Best for extreme heat or severe conditions.

THE RIGHT OIL MAKES A DIFFERENCE. KUBOTA OILS & LUBRICANTS.
Kubota oils and lubricants are specially developed to meet the exacting specifications of Kubota machines. Get your machine winter-ready now by changing the oils and coolants to help maintain performance, reliability and long-term protection.

NOT SURE WHICH OIL YOUR KUBOTA NEEDS?

Speak to your Kubota dealer for advice on the correct Kubota oil and lubricant for your machine.

KUBOTA CARE. COVER FOR THE HOURS YOU WORK.

Your Kubota is an investment in your business.
Kubota Care helps protect that investment with extended warranty cover based on the hours you work. It means greater protection against unexpected repair costs, expert dealer support and the reassurance that your machine is maintained by Kubota-trained technicians.

COVER THAT WORKS FOR YOU.

- Up to 5 years/6000 hours extended warranty*
- Cover based on the hours you work
- No excess charge for warranty claims
- Kubota-trained technicians
- Genuine Kubota Parts & lubricants
- Fully transferable – helping enhance resale value

*Cover and maximum hours are dependent on model. Terms and conditions apply

FROM A KUBOTA CUSTOMER...

“The stand-out for us is the value for money that we get from Kubota. It’s a package that also includes a no-fuss warranty.”

Nick Catchpole relies on two Kubota M6-142 tractors at his dairy farm in Wiltshire, where their performance, value and warranty support have made Kubota an easy choice for the business.
